ATALA MASJID

Atala Masjid (mosque) had been of great importance since Medieval times. Its construction started in 1377 and was completed in 1408 in the regime of Ibrahim Sharquie in order to perpetuate the memory of his cousin Sultan Mohammad, whose real name was Jauna. This mosque represents the earliest and finest example of Sharquie Architecture of distinctive style which bears influence of later Tughlaq Architecture and conforms to the general plan of the orthodox mosque. It's most distinguished feature is the original façade of its prayer-hall. There are three large ornamental archways, the central one soars up to 23 metres.

Annexures - I To VIII

Annexure I Number of villages under each Gram Panchayat
Annexure II Fertility and Mortality, 1991 Census
Annexure III Various measures of fertility and mean age at marriage, 1991 Census
Annexure IV Percentage distribution of Migrants by place of birth/place of last residence, 1991 Census
Annexure V Brief account of main religions in the district/tahsil as per 1991 Census
Annexure VI Marital status of population as per 1991 Census
Annexure VII Age, Sex and Education in the district, 1991 Census
Annexure VIII Distribution of different mother tongues returned in 1991 Census
FOREWORD

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

4. The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified.
and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. Ranvir Singh, Director of Census Operations, Uttar Pradesh. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

New Delhi
Dated: 17.10.2006.

D.K. Sikri
Registrar General &
Census Commissioner, India
Preface

The District Census Handbooks (DCHBs) are brought-out in two parts giving village and town wise data for each district. The first part contains non-census data for each village and town and is called Village and Town Directories Part A. The Part B provides Census data for rural area up to the village level and for urban areas up to ward level for each town or city in the shape of Primary Census Abstract (PCAs). The information contained in Primary Census Abstract and Village and Town Directory (VDs/TDs) has already been released for data users in soft copy. Data available in District Census Handbooks are very useful for policy planners, Administrators, Researchers and other socio-economic research centers. Till 1991 Census, all the inset tables included in District Census Handbooks were produced manually. But this time the software designed by the Data Processing Division of the Office of the Registrar General, India helped in the fast generations of tables.

I am deeply grateful to Shri J.K. Banthia, Ex-Registrar General and Census Commissioner of India for his guidance and support. I would like to thank Shri D.K. Sikri, Secretary, Registrar General and Census Commissioner of India for his sustained support and spontaneous, unflailing guidance through our endeavours. At the outset I thank to Shri R.C. Sethi, Additional Registrar General, India, who drove us to complete the District Census Handbooks within a specific timeframe and make it ready for printing.

I thank to Shri R.G. Mitra, Ex. Deputy Registrar General (C&T), Shri R.P. Singh, Ex. Deputy Registrar General (Map), Dr. I.C. Aggarwal, Ex. Assistant Registrar General (SS) of the office of Register General, India for their guidance at each steps in the preparation of District Census Handbook. Special thanks are due to Shri S.L. Jain, Deputy Director (Social Studies) and Shri Anil Kumar Arora, Deputy Director (EDP), without their untiring efforts and support we could not have completed the District Census Handbook within this time.

The Director of Census Operations, Uttar Pradesh, Dr. Ranbir Singh, under whose guidance, the entire operations were carried out deserves all credit for its success, but he was repatriated to the State Government for taking up some other important assignments before the volume could be made available for the printing. I am also thankful to Shri R. K. Singh, Ex-Joint Director and Shri S.S.A. Jafri, Deputy Director for their valuable guidance and support to complete this project within specific time frame. The task of data collection in respect of both Census and non-census items was a gigantic on which officials in the State Government had to perform along with their normal duties. For their deep sense of devotion to duty and hard work in this regard, I am thankful to all of them.

The preparation of District Census Handbook was done under the supervision and guidance of Shri B.K. Srivastava, Deputy Director of Census Operations and his team of dedicated workers deserves all praise for their perseverance and dedication in preparing for Camera Ready Copy of District Census Handbook.

I am also thankful to Shri Mohan Pandey, Ex-Deputy Director, Shri J. Majhi, Assistant Director, Shri M.M. Pandey, Dr. S.S. Sharma S.I. Grade-I and Shri S.K. Banerjee, S.I. Grade II who assisted in the work for timely completion of the project. S.I.Gr.II, S.I.Gr.III, Sr.Compliers, Compilers, Data Entry Operators and Assistant Compilers who assisted in the work also did a tremendous job. Shri A.M. Ansari, Deputy Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedule through Image Based Data Capturing Technology i.e. Scanning. The members of the staff in the Map Section did a commendable job under the guidance of Shri Dashrath Singh, Research Officer (Map) in bringing out various maps.

District Highlights – 2001 Census

1. District Jaunpur ranks 4th in terms of population in the state.

2. The percentage share of urban population in the district is 7.4 as against 20.8 of the population in urban areas of the state.

3. Jaunpur district has population density of 969 persons per sq. km. which is more than the state average 690 persons per sq. km.

4. Jaunpur district ranks 2nd in terms of sex ratio (1,014) which is higher than the state average (898) females for one thousand males.

5. Jaunpur district ranks 25th in literacy 59.8 which is higher than the state average 56.3 percent.

6. There are only 96 uninhabited villages out of total 3,386 villages in the district.

7. Decadal growth rate of the district 21.7 is lower to the state average of 25.8.

8. Jaunpur tahsil has the highest number of inhabited villages 786 while Badlapur tahsil has the lowest number (407).

9. The district has 9 towns. No new town has been added after 1991 census and no town has been declassified.

10. There are 549,264 households in the district accounting for 2.1 percent of the total households in the state. The average size of households in the district is 7.1 persons.

(xxv)
(i) History and Scope of the District Census Handbook

The district census handbooks were first published after 1951 census. Since then after every decadal census the publication has remained a constant feature with some improvements. This publication has been traditionally brought out by the Census Organization on behalf of each State Government/Union Territory. This publication provides data on demographic characteristics as well as information on the availability of basic amenities in each village and town of respective districts. The scope of the publication has been changing with the changing needs of the data users. The 1951 census series of the publication contained Primary Census Abstract, Village and Town Directories, administrative statistics and an account of the district. In 1961 the publication was in a single volume containing three parts covering Census tables, official statistics and Village Directories. The 1971 Census DCHBs were published in 2 parts. The Part A contained Village and Town Directories and Part B contained Village and Town PCA. The Part C could not be published in many States/UTs which contained administrative statistics and district census tables. The 1981 DCHBs were published on the restructured formats of Village and Town Directories. The DCHBs of 1981 Census were published in 2 parts for each district. The Village and Town Directories comprised Part ‘A’ and PCAs of Villages and Towns (ward-wise) including Scheduled Castes and Scheduled Tribes PCA up to Tahsil/Town level were provided in Part ‘B’. If any amenity except electricity was not available in the referent village, the distance in broad ranges from the nearest place having such amenities was given. Information on some new items were also provided keeping in view of the needs of the Revised Minimum Needs Program. The 1991 DCHBs were almost same in scope as was at 1981. The new features included in 1991 DCHBs were the ninefold industrial classification of main workers and the sex-wise population in the 0-6 age group. Yet other information at the 1991 census was the C.D Block level presentation of data. The VD data was also made available through the magnetic tapes/floppies. Unfortunately in UP no DCHBs relating to 1991 Census were out of press till completion of 2001 Census defeating the very purpose of these publications apart from causing inconveniences to the data users.

The 2001 DCHBs contain more information such as details on greater number of facilities available to the Villages/Towns. The analysis of data with aid of inset tables and statements is more informative. The 2001 DCHBs are fully geared to meet the requirements of Gram Panchayats. At the 2001 Census the DCHBs are entirely available on electronic format and on C.D-ROM; hence the word "Handbook" seems now to be a misnomer.

(ii) Brief History of the District

Around sixth century B.C, during Buddha's time, the district of Jaunpur was under the king Prasenjit of Kosala. It is said that the Pali literature mentions Kerakat and Machhalishahr as part of Kasi Janapada and Buddhism held sway over the district for quite some time. The Gaqadwalla's were the last Hindu rulers of Jaunpur. The district was part of the reign of IIltutmish. Ghyas-ud-din Tughlaq sent his son Zafar Khan in 1321 to Jaunpur. The town of Zafarabad was named after him. Subsequently Tatar Khan worked as governor of Zafarabad. The next governor was Ain-ul-Mulk. Firoz Tughlaq (1351-1388) founded the city of Jaunpur on the banks of river Gomati in memory of Muhammad Jauna (Muhammad bin Tughlak). Muhammad sent Khwaja Jahan to Jaunpur and honoured him with he title of Malik-ush-sharq meaning King of the East in the year 1394. He made Jaunpur his headquarters. The Saiyid dynasty at Jaunpur began in 1414. During the reign of Ibrahim at Jaunpur many learned people resided here. Ibrahim Shah finished the construction of the famous Atala Masjid in 1408. Subsequently Buhlol defeated Hussain and Sharqui kingdom of Jaunpur came to an end. The Sharqui rule lasted in Jaunpur for about 100 years till the
subjugation by Sikandar Lodi. The Sharqui kingdom erected some notable monuments at Jaunpur, some of which are Atala Mosque, Jama Masjid, Jhanjiri Masjid and Lal Darwaja Masjid. These are made in a distinct style known as Jaunpur architecture. Afterwards the importance of Jaunpur declined. After end of Sharqui dynasty the district of Jaunpur passed under the Mughal rule.

During the early period of Mughal's reign the Uzbeks of Jaunpur revolted against Mughal power at Delhi. Munim Khan was the governor of Jaunpur during the reign of Akbar. Later, Munim Khan was made the governor of Bengal. Under Akbar, Jaunpur was a sirkar under the Allahabad subah. During the later period of Mughals, Balwant Singh was a notable administrator of this area. He died in 1770. Jaunpur district was formed in the year 1818. At the time of Mutiny, a Sikh regiment was posted at Jaunpur. This regiment revolted against the British. After this the Sikhs left for Lucknow and as a consequence, the district got out of bound for the Britishers. All the zamindars of the district were in revolt. During the independence struggle Motilal Nehru, Smt. Sarojini Naidu, Jawaharlal Nehru, Madan Mohan Malviya, Shaukat Ali and Muhammad Ali attended Congress meetings at Jaunpur. Mahatma Gandhi visited Jaunpur during October 1929.

(iii) Administrative Setup

The district of Jaunpur forms the north-western portion of the Varanasi division. It is one of the districts forming Purvanchal region of the state. The district is divided into six tahsils i.e. Jaunpur Sadar, Shahganj, Machilishahar, Mariatu, Kerakat and Badlapur. It is further divided into 21 C.D. Blocks, and 1517 Gram Sabhas. The district has nine towns, three Nagar Palika Parishad (NPP) and five nagar panchayat (NP) and one census towns.

No jurisdictional change has taken place during 1991-2001.

District Administration

District administration comprises of Revenue, Development, Police (Law and Order), Judiciary, and Local self-government. District Magistrate is in-charge of revenue administration. He is assisted by Additional District Magistrate (Finance and Revenue) i.e., ADM (F&R). At the tahsil level Sub Divisional Magistrate is in-charge, who is now redesignated as Up-Jila Adhikari. He is assisted by Tahsildars in each tahsil and for revenue collection each tahsil is further entrusted to Naib Tahsildars and Kanoongos circles respectively. For each revenue village, Lekhpal is in-charge. Chief Development Officer and District Development Officer are in-charge for development activities in the district. Various departments have departmental officers at the district level eg. Health, Panchayat Raj, Electricity, Transport, Irrigation, Jal Nigam, Animal Husbandry, Harijan and Samaj Kalyan, Agriculture, Horticulture, PWD, etc. each have a departmental office at district level. In the point of view of development, the district is divided into community development block. Block Development Officers (BDO) look after development works at community development block level, Assistant Development Officer and Village Development Officers at village level.

Under the police set-up Senior Superintendent of Police in big districts and Superintendent of Police in small districts are in-charge. Additional Superintendent of Police (ASP) look after and their respective area. Deputy Superintendent of Police (DSP) look-after
the Thanas allotted to them. Police Inspector and Sub-Inspector are in-charges of their police stations depending upon the population and area.

The Judicial administration of the District is headed by District and Session Judge. In addition there are several Additional District Judges, Civil judge, Chief Judicial Magistrate and Munsif Magistrate and others judiciary officer are also posted for look into the legal matters.

The nucleus of the district body for self government is consisted of Mayor and Mukhya Nagar Adhikari (MNA) in the case of Nagar Nigam, Chairman, Executive Officer in Nagar Palika Parishad and Nagar Panchayat. Chairman District Board and Gram Pradhan in Panchayats and Pramukh of Kshetra Samiti etc. come under Local self-government.

(iv) Physical Features

Location and size:

The district lies between the parallels of 25°24' and 26°12' north latitude and between the meridians 82°7' and 83°5' east longitude. The district is surrounded on the north east by Azamgarh, on the east by Ghazipur, on the north-west and north by Pratapgarh and Sultanpur, and on the south-west by Allahabad. The area of the district is 4,038 Sq.Km. and is situated at 261 feet above sea level. The north to south length of the district is 85 Kms. and west to east breadth is 90 Kms. The district is level plain formed by rivers. The slope of the district is from north-west to south-east as all the rivers flow in the same direction.

Physiography:

On the basis of geology, soils, topography climate and natural vegetation, the district is divided into the following sub-micro regions.

Jaunpur Plain: The region is situated in the north eastern part along the district boundary. It covers the portion of Shahganj, Jaunpur and Kerakat tahsils. The surface is flat and featureless. There is a little variation in slope. In northern part, small segment of the area is tilted towards south whereas the remaining area slopes are towards south-west and west direction. The Maujar river originates from the depressions and drain along the northern part of the district boundary, and turns towards north-western corner. The Gangi drains in western part along the district boundary towards south. There is a small rivulet which originates from the depressions in northern part and drains towards south before joining Gomati river. Soil erosion along the streams is a main physical feature. Besides there are numerous perennial water bodies scattered in the entire tract, and Gajar tal is the largest among them. Geologically, the region is composed of Alluvium, Dun Gravels. Since the surface is flat and irrigated by Lalganj distributary of Sarada Canal, the area is well developed in agriculture.

Gomati Basin: The region extends long on both sides of the Gomati river touching the district limits in the north as well as in the south and covers parts of Shahganj, Jaunpur, Kerakat and Badlapur tahsils. The east and west extension of the tract reaches to the crest of the watershed. The Gomti river enters in the region from the northern part and drains through incised weanders in its course and crosses the district boundary in the south east corner. Ali is the right bank tributary of the Gomti which flows in north-west part of the region towards south-east direction. The Sai joins the Gomti in this region. Besides, there are numerous small rivulets draining in both sides of the Gomti. Deep soil erosion alone the Gomti and its
rivulets are the main characteristics of the tract. Geologically, the region is composed of Alluviums. Dum gravels of Recent time.

**Lower Sai Catchment:** The region is situated in the central part of the district along the Sai river and covers parts of Machhalishahr, Mariahu, Jaunpur, Badlapur and Kerakat Tahsils. The region extends from the deep river bed upto watershed zone on both sides. The Sai is the main and only river flowing in this entire tract towards east and then takes a bend towards south east direction before joining the Gomti. There are sharp bends and eroded surface all along the drainage course of the Sai river. Such physical features are in abundance in the north-western part than other areas. The region is composed of Alluvium, Dum gravels.

**Machhalishahr Plain:** The region is situated in the southern part of the district covering the parts of Machhalishahr, Mariahu and Kerakat tahsils. The entire region is the water catchment zone of the Basuhi river which originates nearby Bhanipur village in northern part of the region and drains towards south-east direction. There are few rivulets of the stream which join the main channel from both sides. Soil erosion along the main channel is very limited. River Varuna drains along the district boundary in the south. The general slope of the region is east oriented. There are few non-perennial natural tanks scattered in all parts of the region. Area is flat and fertile. Geologically, the region is composed of Alluvium and Dum gravels.

**Drainage:**

The district is a flat plain although there are slight undulations caused by the valleys of the rivers. All these rivers flow roughly from north-west to south-east and the slope follows the same direction. Gomti is the main river next to which comes its effluent, the Sai, the Varuna and the Bisuhi which unite in the extreme south and eventually discharge their water into Ganga.

In Jaunpur Plain region the Maugar river originates from the depressions and drain along the northern part of the district boundary and turns towards north-western comer. The Gangi drains in western part along the district boundary towards south. There is a small rivulets which originates from the depressions in northern part and drains towards south before joining Gomti river. Pili is the right bank tributary of the Gomti which flows in north-west part of Gomti Basin region towards south-east direction. The Sai joins the Gomti in the region. Besides, there are numerous small rivulets draining in both sides of the Gomti.

**Climate:**

The climate of the district is same as found in eastern Uttar Pradesh. The duration of hot season is from March to middle of June, which is followed by the south-west monsoon which ends by the end of September. The post monsoon season prevails during October and the middle of November which is followed by the cold season which lasts till February. The average annual rainfall recorded in the district was 987 mm in the year 1997. Most of the annual rainfall occurs between June and September. The temperature goes up from the start of March and it is hottest during May. The heat during summer is intense. January is coldest month. During the year 1997-98 the maximum temperature was 46.8°C and the minimum 3.2°C.
Natural and Economic Resources

Forestry:

There are no forests in the district except dhak (Butea monosperma) jungles which are found in almost all parts of the district. The other trees of the district are only to be found in scattered clumps or in the village sites or along the roadsides. The trees usually found are mango, mahua (Madhuca indica), shisham (Dalbergia sissoo), neem (Azadirachta indica), jamun (Syzigium cumini), Siras (Abizzia lebbeck), pipal (Ficus religiosa), bargad (Ficus bengalensis) and imli or tamariud (Tamarindus indica). Palm trees, ber (Ziziphus xylocarpus), aonlalembica officinalis), bel (Aegle marmelos) and jack fruit. The forest department, under afforestation scheme, has done plantation on an area of 104 hectare of the Gram Samaj Land in 1976-77. The roadside plantation has also been done by the department. The trees planted are generally shisham, mango, neem, jamun, arjun, siris, babul and eucalyptus.

Minerals and Mines:

The mineral products are few, the chief are being limestone, conglomerate known as Kankar, which appears both in the block and in ordinary nodular form. The block kankar occurs principally in the north and north-west notably along the railway line between Mehrawan and Bilwai, while the ordinary nodular form of Kankar is common in all parts of the district. Other mineral product is the saline efflorescence known as reh found on usual land in many scattered localities.

Soil:

The soils of the district consist mainly of loam (domat) and clay (matiyar). The loam is found in Jaunpur and Kerakat tahsils as well as in the part of Shahganj Tahsil lying to the south of the Gomti. Clay soil is found in the depressions and low lying tracts in some parts of Shahganj, Jaunpur and Machhlishahr tahsil and in most part of Kerakat Tahsil.

Land and Land use Pattern:

Land use pattern as recorded in Statistical Magazine 1999-2000 indicated that out of the total reported area of 399,713 hectares forest covers 43 hectares, 8,208 hectares cultivable barren land, 24,032 hectares present fallow, 17,338 hectares other fallow, 7,145 hectares usar and unclutivable land, 44,075 hectares land is used for other than agriculture and 1,502 hectares is pastures. Net area sown was 291,991 hectares and 217,636 hectares was net irrigated area.

Agriculture and Crop Pattern:

There are two main harvests in the district - Kharif and Rabi. The kharif or rain fed crops are sown in June and July and harvested in September – October. Principal Kharif crops are rice, jowar and bajra, sugarcane, sawan, mandua, urd and moong. The rabi or irrigated crops are sown in October and November and harvested in February – March. The principal Rabi crops are wheat, barley, gram, arhar, pea and masoor. Zaid is grown between Rabi and Kharif. During the year 1997-98 out of total sown area of 367,358 hectares under crops, wheat accounted for about 50 percent area, paddy about 34 percent and maize about 13 percent. Chief of the pulses sown are urd, gram, pea and arhar among others.
The share of sown area under the various pulses during the same year was about 9 percent. During the year 1997-98, the average yield of chief crops in quintals per hectare was as following: Paddy 22.48, wheat 23.51, barley 12.18, Jowar 9.70, bajar 10.6, maize 13.8, sawan 6.35, koder 7.0, urd 6.61, moong 5.21, masoor 5.83, gram 9.56, pea 11.63, arhar 11.45, lahi-sarson 8.84, aisi 3.74, til 1.51, sunflower 13.52, sugarcane 558.48, potato 173.83, tobacco 50.38 and sanai 3.85. During the year 1997-98 the output was as following: 788,438 mt. of cereals, 34,136 mt of pulses, 2,042 mt of oilseeds, 834,313 mt of sugarcane, 188,275 mt of potatoes, 655 mt. of tobacco and 528 mt. of sanai.

Irrigation:

Main sources of irrigation in the district are canals, govt. tube wells, pumping sets, wells and tanks. During the year 1997-98, the net irrigated and the gross irrigated area were 217,638 hectares and 337,927 hectares respectively. Among C.D. block, the net irrigated area was maximum at 15,901 hectares in Shahganj and it was least in C.D. block Dharmapur at 5,994 hectares. Out of 217,638 hectares of net irrigated area during 1997-98, canals accounted for about 31%, tube wells (govt. as well as private) about 58%, and rest by other sources such as wells, tanks etc. The state government is contributing directly for irrigation of agriculture land through canals and govt. tube wells. During the year 1998-99 there were 1,458 kms. of canals and 515 govt. tube wells.

Animal Husbandry:

The livestock population of the district at 1993 animal census was 1,500,370. Out of this cattle formed 44.30%, buffaloes 20.27%, sheep and goats 20.60%, horses and mules 0.11%, pigs 5.28% and other animals 9.44%. The number of poultry heads was 451,457 at 1993 livestock census. It was an increase of 1.35% over the previous census held at 1988.

There were 34 veterinary hospitals, 43 stockman centres, 64 artificial insemination centres/sub centres, 3 sheep development centres and 6 pig development centres in the district during 1998-99.

Fishery:

The fish species which are commonly found in the district are rohu (Labeo rohita), nain (Cirrhina mirgala), singhi (Heteropneutes fossilio), raiyer (Cirrhina reha), karouch (Labeo calabasui), parhan (Wallangonia attu), tengan (Myrtus seenghala), and bata (Labeo bata). There were 43 tanks of the fisheries department covering an area of 383.76 hectares which were utilized for the rearing of fish during 1998-99. Most of these are in the C.D. Block Dharmapur. Main tanks of the district are Gujartal in Shahganj C.D. block and Aaratal in Karanjakala C.D. Block. During the year 1998-99 as much as 387 thousand of fingerlings were distributed and 63.38 quintals of fish was produced. Most of this production took place in C.D. Block Khuthan.

Industry:

Industrially the district is backward. Shahganj has a sugar mill. Some industrial units are located at Satharia industrial estate. Carpet weaving, oil crushing, shoe making, pottery, iron-smithy, bamboo – products etc are main industrial activities in the district which are classified as village and cottage industries. Among these, carpet weaving has a good scope.
Trade and commerce:

Trade in the past was restricted to supply of the articles of common use to the inhabitants of the district. Trade and commerce of the district was carried on mainly by big traders, mostly Marwaris of Jaunpur, Shahganj and Badshahpur. Trade consisted entirely in the raw products of agriculture, even the sugar, the main item of Jaunpur was exported in course to the different part of Central India, Kanpur and Punjab and the food grains were sent to Calcutta, Bombay and Kanpur, Oil seeds, peas, onion and garlic were sent to Calcutta, hides and skins to Calcutta and Kanpur, semi-cured tobacco to Varanasi and Patna and scented oils and perfumes to all parts of India. Among articles imported were manufactured articles, cotton and wooden piece-goods, salt, spices, petroleum, metal vessels and utensils, shoes and some quantities of ghee, tobacco and precious metals. The agricultural products are the main item of export while general merchandise and other consumer goods constitute the import.

The articles of daily use of the people are mostly met by traders and peddlers operating in the local bazars of the district. In the rural areas such bazars are known as hats and are held on fixed days of the week to meet the demands of the villagers. Food grains, cloth, vegetables, salt and various other articles are sold in the bazars.

Transport:

During the year 1997-98 the length of paved road in the district was 3,682 km including 1916 kms. constructed by PWD. The Nainital Highway no 68 goes through this district. During the year 1997-98, the length of paved road was 915.7 km per thousand sq km. area and it was 98.1 km. per lakh of population. As many as 1,779 villages were connected with all weather roads during 1997-98. Over 54% of the inhabited villages were connected with paved roads.

The district has both the broad gauge and metre gauge rail lines. The metre gauge line from Shahganj to Ajamgarh has been converted into broad gauge. There are 34 railway stations including halts in the district apart from a total of 132 bus stations/ bus stops.

Electricity and Power:

By the end of March 1999 about 94% of inhabited villages were electrified in the district. The consumption of electricity was 3,479 lakh KWH, during 1995-96, it was 3,530 lakh KWH, during 1996-97 and 3,560 lakh KWH, during 1997-98. The district has 22 electricity substations. Per capita electricity consumption in the district was 111.0 KWH during 1995-96, 98.8 KWH during 1996-97 and 94.8 KWH during 1997-98. About 65% electricity was consumed for agricultural purposes during the year 1997-98 followed by about 18% for domestic lighting and minor power uses.

Gram Panchayat, its composition, jurisdiction and role in villages development

A Gram Panchayat acts as the executive of the Gram Sabha and plays a vital role in village development. There are 1,517 gram Sabhas in the district.

Composition: The members of the village or Gram Panchayat are elected by the members of the Gram Sabha. The members of the Gram Sabha generally elect a small committee of 7-15 members from among themselves who constitute the village panchayat. There are 1,517 gram sabhas in the district.
It is necessary that the village Panchayat should have a member belonging to the scheduled caste and also a woman member. If they are not elected, then the government itself appoints two such members. The Village Panchayat is the sole body, which looks after the various problems of the village and takes steps to improve the conditions of the villagers.

**Its Terms**: The new Panchayat Raj Act of 1993 has fixed a uniform five year term for every Panchayat. It can also be dissolved earlier by the state government, if it fails to perform its duty faithfully. A Sarpanch may be removed from office if two-third Panchas vote against him. But in such a case the sanction of the district administration must be obtained beforehand.

The panchayat normally meets once in a month. If need be, an emergency meeting can also be called by Sarpanch.

**Qualifications**: In order to be elected to a village panchayat, a candidate should possess the following qualifications:

1. He should be a resident of the village concerned and his name should be in the voter's list of the village.
2. He should be twenty five (25) years old.
3. He should be mentally and physically sound.
4. He should not be a proclaimed offender.

**Functions**: A Gram panchayat is entrusted with various social, economic and judicial functions.

1. It provides civic amenities to the people of the village.
2. It gets a primary school opened in the village and supervise its work.
3. It looks after the cleanliness of the village. Drains for waste water are also provided by the Panchayat in the village.
4. It gets a Primary Health Centre opened in the village. The Panchayat has also to provide land and building for such a center.
5. It gets metalled roads build from the village to the nearest road leading to a market place with the help of the Public Works Department of the District.
6. It arranges for sufficient irrigation facilities, improved seeds, insecticides, chemical manures, improved implements and other such facilities with the help of the Block Development Officer of the area for the uplift of agriculture.
7. It manages and maintains the common property of the village.
8. In some states, the Gram Panchayat enjoys also certain judicial powers. It decides petty civil and criminal case and imposes fine upto Rs. 100.
Census Concepts

Building:

A ‘Building’ is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-Residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1 1/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room. In certain parts of the country,
particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses. If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

**Dwelling Room**

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant’s room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office, etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

**Census house**

A ‘census house’ is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non-residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.
If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, ‘singleness’ of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel / Hotel building was treated as one census house. But if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household’s residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant’s quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village
is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

**Rural-Urban area**

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is ‘town’ for urban areas and ‘village’ for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:
   i) a minimum population of 5,000;
   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and
   iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as ‘urban’ all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under ‘Urban Agglomerations’. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

**City**

Towns with population of 1,00,000 and above are called cities.

**Urban Agglomeration**

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).
With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;
ii) two or more adjoining towns with their outgrowths; and
iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A ‘household’ is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc.

To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hule pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the

14
Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The list containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

**Scheduled Castes**:

**Language and Mother tongue**:

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person’s mother to the person. If the mother died in infancy, the language mainly spoken in the person’s home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in
census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc. and other crops such as sugarcane, tobacco, groundnuts, tapioca, etc. and pulses, raw jute and kindred fiber crop, cotton,
cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

**Agricultural labourer**

A person who works on another person’s land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person’s land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

**Household industry worker**

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

**Other worker**

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a ‘Other Worker (OW)’. The type of workers that come under this category of ‘OW’ include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are ‘Other Workers’.

**Work participation rate**

Percentage of workers (main + marginal) to total population.

**Population density**

Population density is the number of persons inhabited per square kilometer of the area.

**Age**

Age is measured in terms of the completed number of years.

**Sex-ratio**

Number of females per 1,000 males in a population.

(vi) **Non Census Concepts**

**Improved drinking water:**

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all states.

**System of Sewerage**

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that
carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylv pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

\[ CBR = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1000 \]

Crude death rate (C.DR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

\[ \text{C.DR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1000 \]

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.
Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

\[
\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1000
\]

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

\[
\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1000
\]

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

\[
\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1000
\]

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

\[
\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1000
\]

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

\[
\text{TFR} = \frac{\sum_{15-19}^{45-49} \text{ASFR}}{x 1000}
\]

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

\[
\text{TMFR} = \frac{\sum_{15-19}^{45-49} \text{ASMFR}}{x 1000}
\]
Age-specific mortality rate (ASMR)
Number of deaths in a particular age and sex group per 1,000 population of the same age
group.

\[
\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1000
\]

\(q1\)
Probability of dying between birth and age 1. This can be used as approximate value of
Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children
aged less than one year to the number of births in that year.

\(q2\)
Probability of dying between birth and age 2.

\(q5\)
Probability of dying between birth and age 5. This indicator is also known as Under Five
Mortality Rate (U5MR)

Infant mortality rate (IMR)
Ratio of the number of infant deaths (deaths of children below one year) in a year to the
number of live births in that year.

\[
\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1000
\]

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-
natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-
natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)
Number of infants dying within the first month of life (28 days or under) in a year per
1,000 live births of the same year.

\[
\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1000
\]

Early neo-natal mortality rate
Number of infant deaths of less than 7 days
during the year

\[
= \frac{\text{Number of infant deaths of less than 7 days}}{\text{Number of live births during the year}} \times 1000
\]

Late neo-natal mortality rate
Number of infant deaths of 7 days to less than 29 days
during the year

\[
= \frac{\text{Number of infant deaths of 7 days to less than 29 days}}{\text{Number of live births during the year}} \times 1000
\]

Post neo-natal mortality rate (PNMR)
Number of deaths of 29 days to less than One year during the year

\[
= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1000
\]
Peri-natal mortality rate (PMR)
Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

\[
PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1000
\]

Still birth rate (SBR)

\[
SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1000
\]

Maternal mortality rate (MMR)
Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

\[
MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100000
\]

Eligible couple (Couples per 1,00,000 Population)
Number of currently married females in the age group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)
1. Number of children in the age group 0-4 years per 1,000 women in the age group 15-49 years.

Child woman ratio (5-9)
2. Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration
Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth. Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course, that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different
from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on ‘reasons for migration’ to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of ‘Others’. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be ‘education’ and not ‘work/employment’.

**Internal and International migration**

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

**Rural-Urban components of migration**

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

**Civic status of urban units**

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g. Municipal Corporation/Corporation, Municipal Committee/Municipal Council, Municipality etc.

**Size class of UA / town**

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 1,00,000 and above population are classified as Class I UAs. / towns. These Class I UAs. / towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3 (300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999). Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

**Slum area**

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.
Mega city:
The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in terms of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally sponsored Scheme for Mega cities, in 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001 Census findings

Population Distribution
The total population of the district is 3,911,679 divided into the 3,622,268 in rural and 289,411 in urban areas. The most populous tahsil is Jaunpur with 927,827 population followed by Mariahu tahsil a population of 733,570. The least populous tahsil is Badlapur with a population of 400,683. The maximum urban population is at Jaunpur tahsil which is 168,851 followed by at Shahganj tahsil with 40,949 urban population whereas the least urban population is in Kerakat tahsil which is 12,488. At the 2001 Census the district has 7.4 per cent of its population living in towns. As compared to this in the State the same is 20.8 per cent. The population of urban population is highest at 18.2 per cent in Jaunpur tahsil followed by 6.5 per cent in Shahganj tahsil and least of 2.1 per cent the Kerakat tahsil. Badlapur tahsil of Jaunpur district has no urban population.

Size, Class and Status of Towns
There are 8 statutory and 1 Census Town in the district Jaunpur with 160,055 population is Class I town. There are three Class III towns in the district. There are three class IV and two class V town, in the district. Three Nagar Palika Parishad in the district are Jaunpur, Shahganj and Mogra Badshahpur apart from Nagar Panchayats namely Kheta Sarai, Machhlishahr, Jafrabad, Kerakat and Mariahu. The sole Census Town of the district is Dhanauha.

Population Growth
The population of the district in 1991 was 3,214,636 in the district. The population of the district at 2001 Census is 3,911,679. There has been decadal variation of population since 1991 amounting to 697,043 in absolute term (21.7 per cent). The males who were 1,612,164 at 1991 Census increased to 1,941,903 and females increased from 1,602,472 to 1,969,776. As against to 21.7 per cent decadal growth in the district, the growth rate of the state of Uttar Pradesh is 25.8.

Population Density
The area of the district is 4038.0 square kilometre. The density of population in the district is 969 as compared to 690 in the state. In the rural areas of the district the population density is 908.

Sex ratio
The sex ratio in the district is 1,014 while it is 898 in the state of Uttar Pradesh. In the rural areas of the district the sex ratio is high at 1,023 while it is only 913 in urban areas. The rural sex ratio of the district is better than the state. The sex ratio of rural areas among six tahsils varies between 1,002 in Jaunpur to 1,056 in Kerakat. Among C.D. blocks the sex ratio varies from 987 in Karanjakala to 1,110 in Muftiganj. The sex ratio in rural population in the district comes to 1,023. Among towns of the district the least sex ratio is found in Shahganj NPP. (899) and highest in Jafrabad NPP. (1008) The sex ratio of population in the age-group 0-6 is 930 in the district which is quite low to 1,014 from the general population. The sex ratio of population of the age-group 0-6 in the rural areas is 931 against 914 in urban areas. The sex ratio of population in the age-group 0-6 among twenty one C.D. blocks varies from...
as low as 905 in Dhobi to as high as 965 in Shahganj. The sex ratio of rural population in the age group 0-6 by ranges for 19.3 per cent population is in the range 900-949. The sex ratio of population in the age-group 0-6 among towns varies from 872 in Kerakat NP to 995 in Dhanauha CT.

**Work Participation Rate**

In the district 31.1 per cent in the 3,911,679 persons pertains to the category of working population. Among males the working population is 40.4 per cent against 21.9 per cent among females. Main workers constitute 20.2 per cent of population. Female workers predominate male among marginal workers. Non-workers contribute 68.9 per cent of total population. Out of these 74.7 per cent are from the urban population and among 68.5 per cent non workers in rural areas, 77.1 per cent females are Non-workers. Of the total worker population in the district 51.8 per cent are cultivators, 20.5 per cent engaged as agricultural labourers, 7.6 per cent in household industry and 20.0 per cent as other workers. Among male workers 50.4 per cent are cultivators as compared to 54.4 per cent among females. Similarly as against 26.6 per cent male other workers, the proportion of female is only 8.2 per cent. In rural areas of the district as much as 54.9 per cent of working population is cultivators as against only 4.6 per cent in urban areas. In case of other workers, the composition of rural and urban proportion is 16.5 and 74.7 per cent of working population. It may be mentioned that the working population in the district is 31.1 per cent as compared to 32.5 per cent in the state.

**Literacy**

In the district 59.8 per cent of the population is literate as against 56.3 per cent in the state of Uttar Pradesh In the district 76.2 per cent of the male population is literate as compared to 68.8 per cent in the state. However, among females the literacy in the district to 44.1 per cent as compared to 42.2 per cent at the state level. In the district literacy rate is 73.1 per cent in urban areas as against 58.7 per cent in rural areas. The gap in male/female literacy rate is 33.2 percentage points in rural areas as compared to 17.7 percentage points in urban areas. The literacy rate among C.D. blocks varies between 55.2 per cent in Karanjakala to 63.8 per cent in Sirkoni Similarly; the literacy rate among towns varies from 60.4 per cent in Kheta Sarai NP to 76.5 per cent in Shahganj NPP.

(vii) Brief analysis of PCA data 1 to 36

The district throws up an vivid picture of its population at the 2001 Census. A few of the peculiar characteristics of the population are being highlighted through the following inset tables.

**TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001**

Table 4 shows the distribution of villages by population density ranges. The inhabited villages of the district have been grouped under eight different ranges of density. The maximum number of villages i.e. 2,582 accounting for 78.5 per cent of the total inhabited villages of the district fall in the density range of 501+ above persons per sq. km. population. The lowest ranges of 0-10 and 11-20 persons per sq. km. cover 264 villages (8.0 per cent). 264 villages (8.0 per cent) have high density with more than 301-500 persons per sq. km. while the corresponding proportion in the lower range of 101 to 300 is 4.2 per cent of the total inhabited villages having 1.1 per cent population of the district. In the medium density ranges of 21 to 50 and 51-100 persons account for 17 and 24 per cent of inhabited villages respectively. Both these ranges claim 1.2 per cent rural population.

NOTE: Sex Ratio has been defined here as the number of females per 1,000 males.

As per 2001 Census sex-ratio of 1,014. Females per 1,000 males have been recorded in the district against the state average of 898. The sex-ratio of the district was significantly high as compared to the state average figures from 1901 to 2001. The lowest sex-ratio of 994 females per 1,000 males was recorded in the district during 1991 against the state average of 876 females. It is also observed that the proportion of females in rural areas is higher than that of urban areas in both district and state.

The table-6 gives sex-ratios for total, rural and urban areas at tahsil level as per 2001 census. There are 1,014 females for every thousand males in the district. It becomes clear from the table that sex-ratio in rural areas is higher than that of urban areas. The sex-ratio among rural and urban population is 1,023 and 913 females respectively. The rural sex-ratio in the tahsils varies between 1002 in Jaunpur tahsil and 1,056 females per 1,000 males in Kerakat tahsil. The sex-ratio in Kerakat Mariahu and Machhlishahr is higher than district rural average (1,023). In urban areas the highest sex-ratio is recorded in Machhlishahr (941) and the lowest is in Jaunpur urban (906).

Table 7 presents C.D. block-wise sex-ratio for rural population in the district. The sex-ratio in rural areas of the district comes to 1,023 females per 1,000 males, as a whole. Among the C.D. blocks the highest sex-ratio of 1,110 females is found in Muftiganj C.D. block and is followed by Mariahu (1,058) while the lowest of 987, is recorded in Karanjakala C.D. block. The sex-ratios of Maharajganj, Sujanganj, Machhlishahr, Mariahu,
Barsathi, Muftiganj, Jalalpur, Kerakat and Dobhi C.D. blocks are higher than the district rural average of 1,023 females and in remaining blocks, this value is below the district average.

Sex ratio (Rural) for District | 1,023                        | |

Table 8 presents the distribution of villages by 9 sex-ratio ranges based on 2001 Census. The maximum number of villages i.e. 1,235 accounting for 37.5 per cent of the total villages having largest population of 44.4. per cent in the district fall in the sex-ratio range of 1,000-1,099 females per 1,000 males. It is followed by the highest sex-ratio range of 1,100+ which claims 793 villages (24.1 per cent) and 17.9 per cent population. The range of 950-999 claims 552 villages (16.8 per cent). This range shares 20.2 per cent rural population of the district while in the sex-ratio range of 900-949; there are 378 villages (11.5 per cent). In remaining sex-ratio ranges of 850-899, 800-849, 750-799, 700-749 and less than 700, the number of villages are 162 (4.9 per cent), 80 (2.4 per cent), 39 (1.2 per cent), 14 (0.4 per cent) and 37 (1.1 per cent) respectively. In these ranges, the percentage of population is comparatively low. The maximum number of villages i.e. 1,235 having maximum population (44.4 per cent) fall in the higher sex-ratio ranges of 1,000-1,099 females.

The table 10 presents population of age-group 0-6 years and sex-ratio for total, rural and urban areas in respect of each tahsil of the district. Total population in age-group 0-6 is 783,771 persons comprising 406,084 males and 377,687 females. The total sex-ratio in this age-group works out to 930 females for every thousand males in the district. The proportion of females in rural areas is higher than that of urban areas. The sex-ratio in rural and urban areas comes to 931 and 914 females in this age-group respectively. The rural sex-ratio in tahsil varies between 926 in Mariahau tahsil and 943 in Shahganj tahsil. The sex-ratio of Shahganj and Machhlishahr, are higher than district rural average (931). In urban areas, the lower sex-ratio is recorded in Kerakat urban (872) and the higher is found in Mariahau urban (937).

Table 12: Sex Ratio of Rural Population in the Age Group 0-6 by Ranges, 2001

Table 12 shows the distribution of villages in 9 sex-ratio ranges of the age-group 0-6 years as well as percentage of villages, total population and percentage of population of this age-group falling in each range of sex-ratio in the district. The maximum number of villages i.e. 591 (18.0 per cent) having population (18.8 per cent) in the district (rural) fall in the sex-ratio range of 1,000-1,099 females per 1,000 males in age of 0-6 years. It is followed by the sex-ratio range of 1,100 and above which claims 562 villages (17.1 per cent) and 9.1 per cent population. Next to it, 462 villages (14.0 per cent) having 19.3 per cent population. 382 villages (11.6 per cent) having 14.8 per cent population fall in sex-ratio range of 850-899. In remaining sex-ratio ranges of 700-749, 750-799, 800-849, less than 700, and 950-999 claim less number of villages and these are distributed as 129 (3.9 per cent), 212 (6.4 per cent), 309 (9.4 per cent), 294 (8.9 per cent and) 349 (10.6 per cent) respectively. In these ranges, the percentage of population is also low. It becomes clear from the table that more than fifty percent of villages i.e. 1,964 having population (53.3 percent) fall in the higher sex-ratio ranges of 900 to 949 and above.

District(Urban) Total 47,926 25,044 22,882 914

Table 13 shows sex ratio of population in the age group 0-6 of urban agglomerations/towns, 2001. In urban area of the district total population in age group of 0-6 is 47,926 in which 25,044 are males and 22,882 females and sex ratio of the urban areas of the district is 914. Among 9 towns sex ratio in age group 0-6 varies from 872 in Kerakat town to 995 in Dhanauha (CT). In Kheta Sarai NP, Machhlishahr(NP), Jafarabad (NP), Mariahu (NP), and Dhanauha (CT) sex ratio is more than the district average. Among 9 towns, Jaunpur town has highest population.

Urban 289,411 26,941 3 9.3 0
Table 14 depicts the distribution of Scheduled Castes and Scheduled Tribes population as well as their percentage to total population at tahsil level in rural and urban areas of the district. Of the 3,911,679 total population of the district, 21.9 per cent of the total population belong to the Scheduled Castes and negligible per cent to Scheduled Tribes. The percentage of Scheduled Castes population constitutes 22.9 per cent in rural population and 9.3 per cent in urban population of the district. The highest percentage of total Scheduled Castes population is recorded in Kerakat tahsil (27.2) while the lowest is found in Jaunpur tahsil (19.4). Proportion of Scheduled Tribes population is in negligible percent in rural and urban areas. Scheduled Tribes population in the district is mainly concentrated in tahsil of Kerakat and Badlapur. The lowest population of Scheduled Tribes is recorded in Jaunpur tahsil and preceded by Shahganj tahsil.

Table 15 shows distribution of Scheduled Castes and Scheduled Tribes population in each C.D. block of the district. 22.9 per cent of rural population of the district belongs to Scheduled Castes and negligible per cent to Scheduled Tribes. At C.D. block level, Scheduled Castes population varies between 17.6 per cent in Ram Nagar and 29.9 per cent in Muftiganj C.D. block. The other C.D. block containing the high percentage of Scheduled Castes are Dobhi (28.8), Kerakat (27.8) and Machhlishahr (25.8). The highest Scheduled Tribes population is counted in Kerakat (101) C.D. block and is followed by Rampur (55) C.D. block. The lowest population of Scheduled Tribes is recorded in Suithakala. (1) preceded by Sirkoni (11) C.D. block.

Table 16 reflects the number of villages according to the proportion of Scheduled Castes population to their total population in different ranges of percentage at district level. 553 villages accounting for 16.8 per cent of total 3,290 inhabited villages in the district do not have any Scheduled Castes population. The proportion of Scheduled Castes population is less than 5 per cent in 159 villages (4.8 per cent). In 305 villages, it varies between 5-10 per cent while the next range of 11-20 per cent accounts for 690 villages constituting 21.0 per cent of the total villages. The range 21-30 and 31-40 per cent contains 671 and 407 villages respectively. Both these ranges together account for 32.8 per cent villages of the district. 505 villages fall in the range of 41-50 and above percent. 108 villages are such where the proportion of Scheduled Castes is more than 75.0 per cent. These villages contain 2.3 per cent Scheduled Castes population of the district. The maximum of the 32.4 per cent of the Scheduled Castes population is covered by range of 21-30 per cent.

Table 17 indicates the distribution of villages by percentage ranges of Scheduled Tribes population to total population in the villages. Negligible per cent of rural population of the district belong to Scheduled Tribes population. There are 3,275 (99.5 per cent) villages where none of Scheduled Tribes have been recorded in the district. 15 (0.5 per cent) villages have proportion of Scheduled Tribes population up to 5 per cent.
Table 18 shows number and percentage of Scheduled Caste and Scheduled Tribe population recorded in urban during 2001 census in district Jaunpur. Scheduled Tribe population is negligible in the urban areas of the district. Only 3 Scheduled Tribe populations were recorded in Shahganj (NPP) in the district.

Table 19 shows sex-ratio among Scheduled Castes and Scheduled Tribes in each C.D. block of the district. The Scheduled Castes sex-ratio is 1,015 for district (rural). Among the
C.D. blocks, the highest sex ratio of 1,102 females is found in Muftiganj C.D. block and lowest of 982 females is recorded in Rampur C.D. block. This table also shows sex ratio of ST population in rural areas of the district is 884 point. It is highest in Karanjakalan C.D block (1,818) and lowest in Sirkoni and Rampur C.D Blocks (571). The scheduled Tribes sex ratio is higher in Badlapur, Barsathi, Karanjakalan and Kerakat C.D blocks than the sex ratio observed at district level.

</table>
District and tahsil-wise literacy rates besides the number of literates and illiterates for total, rural and urban areas are given in table-21. The literacy rates are worked out by excluding population of 0-6 years. As per 2001 Census, the proportion of literates to total population excluding 0-6 years comes to 59.8 per cent in the district. This proportion in rural area is 58.7 per cent against 73.1 per cent in urban areas. In the district the literacy rates of males (76.2 per cent) is much higher than that of females (44.1 per cent). Among the tahsils, Jaunpur, tahsil tops with 62.8 per cent literates followed by Kerakat tahsil (60.7 per cent). Shahganj tahsil with 57.5 per cent literates stands at the bottom in the district. Out of 6 tahsils, the literacy rates of Jaunpur and Kerakat, tahsils are higher than that of district average. It is observed that in urban areas of district the literacy rates are higher than the rural areas.

The gap between male and female literacy is very high which as a whole comes to 32.1 percentage points in the district. The situation at tahsil level is not much different. However, this gap in urban literacy is low which comes to 17.8 points against the rural areas, where the gap between male and female literacy is 33.2 points.

</table>

The table 22 reveals number of literates, illiterates and the literacy rates in rural areas at C.D. block level in the district. 58.7 per cent of the total rural population excluding the age-group of 0-6 years are literates in the district. The corresponding proportion of male and female literates comes to 75.7 and 42.5 per cent respectively which shows very wide gap of 33.2 percentage points in male and female literacy. At C.D. block level, Sirkoni C.D. block has the highest rural literacy rate of 63.8 per cent while 79.0 per cent males and 48.9 per cent females are literates in this block. The lowest literacy rate in rural areas is noted in
Karanjakalan C.D. block (55.2 per cent). There are wide variations in male and female literacy in all the C.D. blocks of the district. The maximum difference of 38.2 points is found in Barsathi C.D. block.

**Literacy rate for District:** 59.8

Table 23 gives the distribution of villages by literacy rate ranges in the district. There is no literate person in 8 villages (0.2 per cent) of the district and population of these villages is only 68 persons. 7 villages (0.2 per cent) have all the literate population. 1,311 villages accounting for 39.8 per cent of the total villages are in the literacy range of 51-60 per cent and 1,104 villages (33.6 per cent) fall in the literacy range of 61-70 per cent. The lower literacy rate of 1 to 50 per cent observed were in 590 villages (17.9 per cent) of the district. The higher literacy ranges of 71 to 100 per cent covers 277 villages (8.4 per cent). The range of 51-70 have the maximum number of 2,415 villages forming 73.4 per cent of the total inhabited villages.

</table>
Table 24 shows number and percentage of literates and illiterates by sex during 2001 in the urban areas of the district. Regarding absolute figures of literates, Shahganj (NPP) town is way ahead of other towns. The table reveals that literacy rate is high in the urban areas of the district (73.1 per cent). The literacy rate is quite high (above 83.0 per cent) in Shahganj (NPP), Mogra Badshahpur (NPP), Jafрабad (NP), Dhanauha, (CT) and Kerakat NP among males. Female literacy rate is not far behind in Shahganj (NPP) 68.4 per cent and Jaunpur (NPP) (above 66.7 per cent). However, literacy rate among females is low (48.0 per cent) in Kheta Saraitown. The gap in male female literacy rate is normal (17.8 per cent).

The table 28 brings out the number and percentage of Scheduled Tribes literates and illiterates by sex in C.D Blocks at the 2001 census. The number of illiterates is more than literates in the district and C.D Blocks. The literacy rate of the Scheduled Tribes population at about 8.4 per cent is lower than the corresponding rate of 48.6 per cent in case of scheduled castes community. The gap in male and female literacy rates at 5.9 percentage points is lesser than the Scheduled Castes community (34.9 percentage points). The literacy rate is highest in Sirkoni C.D Block and lowest in Khuthan C.D Block. The gap in male/female literacy rate in Kerakat C.D Block is in favour of the females, which is an exception and otherwise the highest gap is in Sirkoni C.D Block.

Literacy rate for District (Rural) 8.4
The table 29 gives the distribution of villages by literacy rate range for the Scheduled Tribes population at the 2001 census. In the district the Scheduled Tribes population is found in 15 villages out of which in only one village the literacy range is 100 per cent. However, the maximum (46.1 per cent) of the Scheduled Tribes population is found in only 4 villages with literacy range from 1 to 10 percentages. In 7 villages (46.7 per cent) Scheduled Tribe's population had zero percent literacy rates.

Table 31 gives the number and percentage of main workers, marginal workers and non-workers by sex at tahsil level in the district as per 2001 Census. The proportion of the total workers is 31.1 per cent of the total population in the district. The total workers are comprised of 20.2 per cent of main workers and 10.9 per cent of marginal workers and the remaining 68.9 per cent are non-workers.

Among the main workers, male participation rate in the district is 32.5 per cent and 8.0 per cent of females.5 Male and female marginal workers account for 7.9 and 13.8 per cent respectively. The percentage of female's marginal workers is higher than males. Total workers (main and marginal workers) among tahsils vary from 29.4 per cent in Jaunpur tahsil to 32.5 per cent in Machhlishahr tahsil.

Table 32 Contd............
Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 3,622,268 total rural population of the district, 20.1 per cent has been categorised as main workers and the marginal workers constitute 11.5 per cent and the remaining 68.5 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 32.1 per cent males and 8.3 per cent females are in the category of main workers. Male and female marginal workers account for 8.2 and 14.6 per cent respectively. The percentage of female marginal workers is higher than male marginal workers. Similar trend is visible at C.D. block level also.

The percentage of total rural workers of the district comes to 31.5 per cent. At the C.D. block level, Khutan has highest proportion of total workers forming 37.0 per cent of the total population. Machhlishahr closely follows by (35.6 per cent), Mariahu (34.9 per cent), Jalalpur (33.4 per cent), Rampur (32.5 per cent) and Baksha and Ramnagar (31.7 per cent). The lowest percentage of 28.4 per cent is recorded in Dobhi C.D. block.

Table 32 shows C.D. block-wise number and percentage of main workers, marginal workers and non-workers for rural population of the district. Of the 3,622,268 total rural population of the district, 20.1 per cent has been categorised as main workers and the marginal workers constitute 11.5 per cent and the remaining 68.5 per cent fall in the category of non-workers. The sex-wise break up at the district level shows that 32.1 per cent males and 8.3 per cent females are in the category of main workers. Male and female marginal workers account for 8.2 and 14.6 per cent respectively. The percentage of female marginal workers is higher than male marginal workers. Similar trend is visible at C.D. block level also.

The percentage of total rural workers of the district comes to 31.5 per cent. At the C.D. block level, Khutan has highest proportion of total workers forming 37.0 per cent of the total population. Machhlishahr closely follows by (35.6 per cent), Mariahu (34.9 per cent), Jalalpur (33.4 per cent), Rampur (32.5 per cent) and Baksha and Ramnagar (31.7 per cent). The lowest percentage of 28.4 per cent is recorded in Dobhi C.D. block.

The table 33 gives number and percent of main workers, marginal workers and non-workers by sex in urban area of the district at the 2001 census. The proportion of the total workers work out to 25.3 per cent at the total urban population of the district. The total workers are comprised of 21.3 per cent main workers and 4.0 per cent of marginal workers and the remaining 74.7 per cent are non-workers.

Among the main workers, male participation rate in the district is 36.4 per cent whereas female participation rate is only 4.9 per cent. male and female marginal workers accounts for 4.8 per cent and 3.1 per cent respectively. Total workers (main and marginal workers) among towns varies from 23.2 per cent in Kheta Sarai (NP) to 31.0 per cent in Dhanauha (CT).

</table>

It can be seen from the table 34 that the economy of the district is primarily agricultural as supported by the fact that cultivators constitute 51.8 per cent of the total workers (main +marginal) and 20.5 per cent are engaged as agricultural labourers. Household industry workers are 7.6 per cent and other workers 20.0 per cent in this district.
The distribution of workers by four categories of economic activity at tahsil level shows very high dependence of population on agriculture sector absorbing large number of workers. The proportion of cultivators varies between 45.9 per cent in Jaunpur tahsil and 58.8 per cent in Badlapur tahsil. These variations within the district may be due to different cropping and land holding patterns. The percentage of female cultivators is 54.4 per cent as compared to 50.4 per cent of male cultivators in the district. The percentage of household industry workers is very low in the district as stated above. The workers in other activities occupy the third position, second to agriculture in the district. The highest proportion of 28.5 per cent of other workers is recorded in Jaunpur tahsil while the lowest proportion of 15.5 per cent is found in Badlapur tahsil.

Note: Percent of Worker to total worker are given in brackets
Table 35 presents C.D. block-wise distribution of workers by sex in four categories of economic activity. In the rural areas of the district, total workers (main+marginal) are 31.5 per cent of total population. Among these workers, cultivators constitute 54.9 per cent; 21.6 per cent agricultural labourers, 7.0 per cent household industry workers and remaining 16.5 percent are other workers. The agricultural sector plays a major role in providing employment to the working force of rural population despite the fact that it is not commercial viable. Household industries also could not make much progress in rural areas as reflected in the data and these household industries employ only 7.0 per cent workers of the total working force. Therefore, surplus-working force has to depend on primary activities. Among cultivators, the percentage of females (55.6 per cent) is slightly higher than males (54.4 per cent) in the rural areas of the district. The proportion of cultivators and other workers differ considerably from one C.D. block to other. The proportion of cultivators varies between 45.8 per cent in Shahganj C.D. block to 63.6 per cent in Machhlishahr C.D. block. Similarly for other workers, the lowest proportion is 9.9 per cent in Machhlishahr C.D. block while 24.7 per cent is the highest in Dharampur C.D. block. The percentage of household industry workers is quite low i.e. only 7.0 per cent in the district. The percentage of agricultural labourers is highest in Shahganj block (31.2) and is followed by Suithakala (29.6) Similarly, household industry workers varies in C.D. blocks between 3.6 per cent in Muftiganj and 15.8 percent in Rampur.

Table 36 Contd.……...
Table 36 presents distribution of workers by sex in four categories of economic activity in urban areas of the district. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table have been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other workers (74.7), followed by household industry workers with 17.2 per cent (13.1 per cent male and 40.4 per cent female). If we observe each town, the table reveals that highest percentage of cultivators (13.7) is recorded in Kheta Sarai. In the agriculture labourers category in Kerakat C.D block, recorded very low percentage (1.2 per cent). Household industry workers are also very low (3.2 per cent) in Shahganj (NPP), 9.0 per cent in Mogra Badshahpur (NPP) and, 13.7 per cent in Jaunpur NPP. As the usual trend recorded in the urban areas, other workers are in high percentage 92.4 per cent in Shahganj NPP, 80.7 per cent in Jaunpur and 80.4 per cent in Mogra Badshahpur NPP.

Table 36 presents distribution of workers by sex in four categories of economic activity in urban areas of the district. It can be observed from the table that the four categories of economic activity are cultivators, agricultural labourers, household industry workers and other workers. Figures in the table have been given for total number of workers including main and marginal workers. At the district level, urban areas recorded highest percentage of other workers (74.7), followed by household industry workers with 17.2 per cent (13.1 per cent male and 40.4 per cent female). If we observe each town, the table reveals that highest percentage of cultivators (13.7) is recorded in Kheta Sarai. In the agriculture labourers category in Kerakat C.D block, recorded very low percentage (1.2 per cent). Household industry workers are also very low (3.2 per cent) in Shahganj (NPP), 9.0 per cent in Mogra Badshahpur (NPP) and, 13.7 per cent in Jaunpur NPP. As the usual trend recorded in the urban areas, other workers are in high percentage 92.4 per cent in Shahganj NPP, 80.7 per cent in Jaunpur and 80.4 per cent in Mogra Badshahpur NPP.
Brief analysis of the village Directory and Town Directory data based on inset tables 37 to 47.

One of the major parts of the District Census Handbook is Village and Town directories. These are non-census date incorporated showing educational, medical, drinking water, banking facilities, communication facilities and other such developmental indicators in the towns and villages. From this non-census data certain inset tables have been generated and reproduced below showing major trends in the availability of above amenities.

Note: - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or 'Otherwise'. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 deals with the C.D. block-wise distribution of villages according to the availability of different amenities like education, medical, improved drinking water, post office, telephone, transport, communications, agricultural credit societies, approach by pucca road and power supply within the village. Out of 3,290 inhabited villages in the district, 1,975 villages or 60.0 per cent have been provided with the education facilities of one type or the other. Similarly, 621 villages in the district constituting 18.9 per cent have medical facilities of one type or the other. Improved drinking water facility is available in 3,232 or 98.2 per cent villages. As regards, post office facility which includes facilities like telegraph office and post & telegraph, 399 villages constituting 12.1 per cent of villages have been provided with post office facility within the village. 639 or 19.4 per cent villages have been provided with the telephone facility, 266 or 8.1 per cent with transport facility, 167 or 5.1 per cent villages with bank facility and 206 or 6.3 per cent with agricultural credit societies. Similarly, there are 2,009 or 61.1 per cent villages, which have been linked with the pucca road. Total 2,726 or 82.9 per cent of villages have been provided with the electricity supply. Almost similar pattern of distribution of villages by availability of amenities in the villages at C.D. block has been found with slight variation. Mogra Badshahpur C.D. block has the highest 78.2 per cent villages where educational facility is available and lowest 37.0 per cent is found in Sirkoni. Medical facility is highest in Dobhi (51.6 per cent) and lowest (5.3 per cent) in Machhlishahr C.D. block. Improved drinking water is available to cent-percent villages in Maharajganj, Mogra badshahpur, and Machhlishahr blocks while in other blocks, it is above 94.0 per cent. Telephone facility is highest in Shahganj (33.3 per cent) while 10 villages (5.8 per cent) of Maharajganj C.D. block enjoy this facility. Transport and communications is less developed in Muftigunj and Khuthan C.D block, where only 1.1 and 1.6 per cent villages respectively are covered by this facility whereas 16.4 per cent villages of Barsathi C.D. block are availing this facility. In the field of power supply, 82.9 per cent villages have been covered in the district.

**TABLE 38: NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001**

Note: Percentages are given in brackets. *Based on the improved drinking water source, drinking water supply has been classified as 'improved' or 'otherwise' if the household has access to drinking water supplied from a tap or a hand-pump/tube well located within or outside the premises it is considered as having access to 'improved drinking water source'. However, the concept of improved drinking water is a site specific and this is to be considered accordingly. # Post office includes Post office, telegraph office and Post and telegraph office. $ Transport communication excludes bus service, rail facility, and negligible waterways.
Table 38 depicts the number and proportion of rural population served by different kind of amenities. Out of total rural population of 3,622,268 persons in the district, 2,973,493 or 82.1 per cent have educational facility of one or the other type. Similarly 1,217,570 or 33.6 per cent have got improved drinking water facility. Post office facilities are available to 988,058 or 27.3 per cent population. Telephone facility is available to 1,174,279 or 32.4 per cent. Transport communications facility is available to 483,316 or 13.3 per cent. Bank facility is available to 421,763 or 11.6 per cent. 469,873 or 13.0 per cent have been provided with the facility of agricultural credit societies. 2,626,378 or 72.5 per cent have been provided with the facility of approach by pucca road. Power supply is available to 3,186,992 or 88.0 per cent rural population in the district. Similar pattern of availability of facilities is visible to the rural population at C.D. block level. However, in Jalalpur, Kerakat and Dobhi C.D. blocks facilities of education, medical and improved drinking water are available to larger proportion of population.

Table 39 presents distribution of villages not having certain amenities within the village at district level. They have to go out of their village to avail these facilities. Such villages have been presented according to various distance ranges in this table. 1,338 villages do not have primary school in their villages and out of these villages, children of 1,227 villages have to travel less than 5 kms. for schooling. Out of 3,290 inhabited villages as many as 2,695 are deprived of middle school and 3,250 of degree college. Of these 1,964 avail the facility of middle school at a distance of less than 5 kms., 710 at a distance 5-10 kms. and the remaining 21 at a distance of 10+ kms. In respect of Degree College 805 avail this facility at a distance of less than 5 kms., 1,043 between 5 to 10 kms. and rest 1,402 villages at a distance of 10+ kms.

Similarly there are 3,230 villages in the district, which have been devoid of Hospital facility, and 3,260 villages which are deprived of PHC facilities. Of these 897 villages have the facility of Hospital available within 5 kms. while in respect of 1,148 villages the inhabitants have to cover a distance of 5-10 kms. in order to avail this facility. Similarly overwhelming number i.e. 1,185 villages have this facility at a distance of 10+ kms. As regards PHC 751 avail this facility at a distance of less than 5 kms., 1,695 at a distance of 5-
10 kms. and the remaining 814 have to travel a distance of more than 10 kms. to avail this facility. Regarding Post Office, 2,891 villages do not have this facility in the village itself. Of these majority i.e. 2,391 have this facility at a distance of less than 5 kms., another 471 villages avail it at a distance of 5-10 kms. In the remaining 29 villages habitants have to travel a distance of 10+ kms.

As regards Telephone, there are 2,651 villages in the district, which are without telephone facility. Of these 1,759 avail this facility at a distance of less than 5 kms., 638 at a distance of 5-10 kms. and remaining 254 have to traverse a distance of 10+ kms. For Bus service out of 3,099 villages which do not have facility, however, 1,177 villages avail this facility at a distance of less than 5 kms., 1,213 at a distance between 5-10 kms. and 709 at a distance of 10+ kms.

In the entire district 3,142 villages are deprived of Commercial Bank and 3,235 of Co-operative Bank. Of these 3,142 villages which are deprived of Commercial Banks 2,192 villages avail this facility at a distance of less than 5 kms., 858 between 5-10 kms. and the remaining 92 at a distance of 10+ kms. Regarding Co-operative Banks out of 3,235 villages 1,073 villages avail this facility at a distance of less than 5 kms., 1,578 at a distance of 5-10 kms. and remaining 584 at a distance of 10+ kms. 3084 villages do not have agricultural credit societies. This facility to 2,426 villages is available at a distance of less than 5 kms., 589. at a distance of 5-10 kms. and the remaining 69 at a distance of 10+ kms.

# Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communications includes bus service, rail facility and navigable waterways

Table 40 deals with the distribution of villages according to distance from the nearest statutory town and availability of different amenities within the village. Out of total 3,290 inhabited villages in the district, there are 418 villages, which have nearest towns upto a distance of 5 kms. Of these only 210 villages forming 50.2 per cent of these total villages, are having the educational facilities of one type or the other and 60 villages constituting 14.4 per cent, have the medical facilities within the village, 28 villages forming 6.7 per cent have the facility of post office within the village and 64 or 15.3 per cent have the facility of telephone. 42 villages constituting 10.0 per cent have been linked by transport service. 12 villages comprising 2.9 per cent have been provided bank facilities, while 12 villages also constituting 2.9 per cent have been provided by agricultural credit societies. 261 villages comprising 62.4 per cent have been provided with pucca road.
There are 1,775 inhabited villages in the district which fall in the distance range of 5-15 kms. Of these, 1,080 villages constituting 60.8 per cent have been provided with the educational facilities. 335 villages comprising 18.9 per cent have been provided with medical facilities. 225 villages constituting 12.7 per cent enjoy the post office facility. 383 villages comprising 21.6 per cent have been provided the telephone facility. 139 villages constituting 7.8 per cent have been linked with transport communications. 92 villages comprising 5.2 per cent have bank facility. 120 villages constituting 6.8 per cent are having agricultural credit societies, while 1093 villages or 61.6 per cent are approachable by pucca road. 948 villages fall in the distance range of 16-50 kms. Of these, 64.7 per cent villages have educational facility, 21.7 per cent with medical, 14.2 per cent with post office, 17.7 per cent with telephone and transport & communications available to 7.8 per cent villages. Banks and agricultural credit societies facilities are available to 5.6 and 6.8 per cent of villages respectively. There are 4 villages in the district which are situated beyond 50 kms. from the nearest town and out of these 2, or 50.0 per cent enjoy the education facility in the village itself whereas only one village comprising 25.0 per cent have been provided with medical facility of one type or the other. There is no village in this distance range, which have post office, telephone transport communication, bank, agricultural credit societies and pucca roads facilities.

There are 145 villages whose distance ranges, from the nearest statutory town have not been given. Such villages have been grouped under the unspecified category. 70 or 48.3 per cent villages have the educational facility of one or other type. 19 village constituting 13.1 per cent have the medical, 11 villages constituting 7.6 per cent enjoy the post office facility, 24 villages comprising 16.6 per cent have been provided the telephone facility. 11 villages constituting 7.6 per cent have been linked with transport communication. 10 villages comprising 6.9 per cent have bank facility, while 93 villages or 64.1 per cent are approachable by pucca road.

# Post office includes Post office, Telegraph office and Post and telegraph office
$ Transport communication includes bus service, rail facility, and navigable waterways
* Based on the improved drinking water source, drinking water supply has been classified as 'improved' or otherwise if the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'improved drinking water source'

However, the concept of improved drinking water is state specific and this is to be considered accordingly.
Table 41 deals with the distribution of villages by population ranges and amenities available therein. In Jaunpur district out of a total 3,290 inhabited villages, there are 1,107 villages have a population of less than 500 persons. Of these, 269 villages (24.3 per cent) have education facility, 53 (4.8 per cent) have medical facility, 1,068 (96.5 per cent) have improved drinking water facility. No village (0.0 per cent) have post office facility. 63 (5.7 per cent) have telephone facility. 36 (3.3 per cent) have been linked by bus service. 7 (0.6 per cent) have Bank facility. No village (00.0 per cent) have been provided with the agricultural credit societies, 527 villages (47.6 per cent) have been linked with pucca road 828 villages (74.8 per cent) have been provided with electricity.

Out of 839 villages, which fall in the population range of 500-999 persons, 517 villages (61.6 per cent) have been provided with the education facility, 120 (14.3 per cent) with medical facility, 830 villages (98.9 percent) have improved drinking water facility, 58 villages (6.9 per cent) have been provided with post office facilities, 128 villages (15.3 per cent) with telephone facility, 62 villages (7.4 per cent) with transport facilities, 17 villages (2.0 per cent) with bank facility, 37 villages (4.4 per cent) with agricultural credit societies, 496 villages (59.1 per cent) have approach by pucca road and 699 villages (83.3 per cent) in this range have electricity.

863 villages fall in population range of 1,000-1,999 persons. In this population range, 211 villages (24.4 per cent) enjoy the medical facility, 854 villages (99.0 per cent) have improved drinking water facility, 128 villages (14.8 per cent) have post office facility, 231 villages (26.8 per cent) have telephone facility, 78 villages (9.0 per cent) have transport /communications facilities, 51 villages (5.9 per cent) have bank facilities, 68 villages (7.9 per cent) have agricultural credit societies 586 villages (67.9 per cent) have approach by pucca road and 759 villages (87.9 per cent) have power supply facility.

There are 444 villages in the district which are covered under 2,000-4,999-population range. 419 villages (94.4 per cent) have been provided with the education facility, 210 villages (47.3 per cent) have medical facility. 443 villages (99.8 percent) enjoy the facility of improved drinking water (except one village), 186 villages (41.9 per cent) have post office facility, 79 villages (17.8 per cent) have transport communications facilities, 193 villages (43.5 per cent) have telephone facility, 80 villages (18.0 per cent) have bank facility, 181 village (20.5 per cent) is having agricultural credit societies, 366 villages (82.4 per cent) have approach by pucca road and 407 villages (91.7 per cent) have been provided with electricity. There are 36 villages in the district having a population of 5,000-9,999 persons. In this range, maximum number of villages enjoy the facility of education, medical, improved drinking water, post office, telephone, approach by pucca road and power supply. There is on village in the district having a population of 10,000+ persons. This village have all the facilities except transport, bank and agricultural credit societies.

**TABLE 42: Contd……..**
Table 42 presents C.D blockwise distribution of villages according to land use. It also gives details of total area and cultivable area available in inhabited villages of the district. Cultivated area includes irrigated as well as unirrigated area. It further elaborates that what is the extent of cultivable area under irrigation. There are total 3,290 inhabited villages in the district having a total area of 403,051.3 hectares. Of this, 77.8 per cent is cultivable and 81.2 per cent of total cultivable area has got the irrigation facility. The area figures have been collected from the revenue record maintained for each village by the State Government.

The land use pattern at C.D block level shows that the percentage of cultivable area to total area is highest (95.4 per cent) in Khuthan C.D block and lowest (33.8 per cent) in Sirkoni C.D block. Similarly the percentage of irrigated area to total cultivable area is highest (95.5 per cent) in Dobhi C.D block and is lowest (58.4 per cent) in Sirkoni C.D block.

Table 47 indicates most important articles manufactured and exported out of the each town in the district. The district is well known for carpets earthen pots, bidi and iron goods. The chief export items of the district are vegetable, sugar, oil seeds, bidi and leather goods.

Brief analysis of the data on houses and household amenities, House listing Operations, Census of India 2001: based on inset Table 48 to 52. Data on houses and household amenities have traditionally been undertaken a few months before each census. Based upon data collected in the houselist, a few tables on the use of census house, materials of wall, floor and roof etc. are prepared. In 1991 census, the houselist was considerably expanded with 22 items of information. Again in 2001 census many new items on household assets like radio/transistor, television, telephone, cycle, scooter/motorcycle/moped, car/jeep and banking facility availed by household etc. for the first time has been added in the schedule.

District Total 544,548 506,311 38,237 144,106 139,468 4,638 5,495 4,876 619

The data presented in the Table 48 depicts number of households by tenure status and number of rooms occupied in the district. The total number of households in the district stands at 544,548 consisting of 506,311 rural and 38,237 urban households. 144,106 households belong to Scheduled Castes and 5,495 to Scheduled Tribes. 533,073 households are living in their owned houses constituting 97.9 per cent of total households. Of these households, the largest number of households (155,500) have occupied three plus room accommodation and is followed by double room accommodation numbering to 154,925 households. Next position is claimed by households (120,196) occupying single room accommodation. Number of households in owned accommodation occupying three rooms rank at fourth place with 89,177 households while 13,275 households are without any exclusive room.

7,488 households living in rented accommodation account for 1.4 per cent of total number of households in the district. The largest number of 2,868 households is living in double-room accommodation followed by 2,315 households in single room accommodation. Households with three rooms and three plus are small in numbers. Other households numbering to 3,987 forming only 0.7 per cent of total households are distributed in single room accommodation numbering 1,416 double room and 567 in three room accommodation. In rural areas majority of households have bigger size and majority of them have their own houses.

District Total 49.7 43.3 7.0 46.8 45.9 7.3 87.5 9.6 2.9

Note -
Permanent - 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e., burnt bricks, G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tile slate, shingle, corrugated iron, zinc or other metal sheets, asbestos sheets, bricks, lime and stone and RCC concrete are used for roofs.
Semi permanent - 2 Semi-permanent houses refer to those houses made of other types of materials.
Temporary - 3 Temporary houses refers to those houses having wall and roofs made of Kuchha materials i.e., where grass, leaves, reeds, bamboo mud, unburnt bricks, and straw etc. are used for roofs.

The percentage distribution of households as shown in the above table reveals that 49.7 per cent of the households in the district had permanent houses. The trend is different in rural (46.8 per cent) and urban area (87.5 per cent). Among tahsils highest proportion of permanent houses were accounted in tahsil Jaunpur (60.8 per cent) followed by Kerakat (51.9 per cent), Machhlishahr (48.2 per cent) and lowest in Shahganj (39.0 per cent). In respect of semi-permanent houses, the returns were 43.3 per cent of district level whereas among tahsils, in Shahganj it was 55.3 per cent and lowest was 31.2 per cent in tahsil Jaunpur. Rural areas represented a similar ratio at district and tahsil level but semi permanent houses in the urban areas were in the proportion range of 6.0 to 16.4 per cent. Temporary houses in the district lie between the range of 5.3 to 11.6 per cent.

*Based on the improved drinking water source, drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households. Bathroom means bathroom within the house. Toilet means toilet within the house. Drainage means closed and open drainage.

The table 50 indicates that 70.5 per cent households in the district have been provided with improved drinking water. 30.7 per cent households have provision of electricity in the houses. The bathroom facility is available to only 18.8 percent households within their premises. As regards rural areas, 16.3 per cent households are having bathroom facility whereas this proportion in urban areas comes to 52.3 per cent. 26.8 per cent rural households have facility of electricity against 81.7 per cent in urban area. Toilet and drainage facilities in the district are available to 16.3 per cent and 48.9 per cent households respectively; their percentage is much higher in urban areas as compared to rural areas. The trend of these amenities available to the households at tahsil is almost confirmed to the district pattern analysed.

Percentage in brackets
It is observed from the above table that 37.3 per cent of households in the district use firewood as fuel, for cooking, the proportion in the rural area is 36.7 and in urban area it comes to 45.3 per cent of households. Cowdung cake has been reported as one of the fuel for cooking of food in 49.2 per cent of the households. The composition of rural and urban comes to 52.7 and 3.5 per cent respectively. L.P.G. (cooking gas) is used for cooking in 3.6 per cent of the households (1.8 per cent rural and 28.6 per cent urban households). The other methods like crop residue, coal, lignite, charcoal, electricity and biogas etc. ranges between 0.1 per cent to 7.2 per cent of the households of the district. The pattern of fuel used for cooking follows the same trend in tahsils (rural areas) where predominant fuel is firewood. The table shows that firewood, Cowdung cake and crop residue are the predominant fuel for cooking in the district.

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

This table presents data for total, rural and urban areas at district/tahsil level about households availing banking services and possession of assets such as radio/transistor, telephone bicycle, scooter and car etc. by the households. There are 544,548 households in the district and among them, 284,299 have been availing banking services. 218,443 households have Radio/transistor, Television is possessed by 131,551 households. Telephone is available in 18723 households. Bicycle is main means of transportation and is available in
427,624 households. 55,797 and 13,489 households use scooter/ Motorcycle/ Moped and Car/ Jeep/ Van respectively. The trend regarding use of banking services and possession of assets by households at tahsil level is almost similar as analyzed above for the district as a whole.

(xi) Major Social and Cultural Events, Natural and Administrative Developments and Significant Activities during the Decade;

No significant social, cultural event or natural and administrative development has taken place during the last decade.

(xii) Brief description of places of Religious Historical or Archeological Importance in villages and places of Tourist Interest in the towns of the district;

Shahi Kila was constructed by Firozshah in 1362. Atala Mosque, which is situated in the centre of Jaunpur town was constructed by Ibrahimshah in 1408. He also constructed Jhajhari Mosque on the north bank of the Gomati river, Masjid Lal Darwaja situated at Begamganj in Jaunpur was constructed in 1455. Jama Masjid, yet other attraction is situated near Purani Bazar. Akbar constructed Shahi Pul over Gomati river in the middle of Jaunpur town in 1564. Jama Masjid at Machhalishahr is also a centre of attraction. Gujartal, near Khetasarai is a beautiful natural lake. Other attractions of the district are Trilochan Mahadevji temple in C.D. block Jalalpur, Ma shitla Chaukiya temple in C.D. block Dharampur and Maihar Ma temple, a new construction in the town of Jaunpur.

(xiii) Major Characteristics and contribution of the District;

Jaunpur had been seat of Sharqui dynasty since A.F. 1394 till about a century. At that time Jaunpur was known as Shiraz of India. The rulers constructed a number of buildings which are fine pieces of architecture, styled as Jaunpur architecture. The glory of the town and district thus lie in its ancient relics. The most famous of these is the Atala Masjid, completed in 1408 by Ibrahim Shah.

The purvanchal University at Jaunpur was established on October 2, 1987. Many colleges in several district of eastern U.P. are affiliated with this university. The University is providing technical education also.

The Janpad Hindi Sahitya Sammelan Jaunpur was established with the aim of propagating Hindi. It hold goshtis (assemblies of poets) kavi sammelons (poeticsymposia). It runs a library also to further the spread of education. The first library known as Tilak Pustakalaya in the district was established in 1921 after the name of Lokmanyya Tilak. The Shia Library, Jaunpur was established in 1936.
xiv) Scope of Village Directory and Town Directory Column Heading wise Explanation and Coverage of Data

Village Directory:

The village directory as the title connotes presents information pertaining to rural-areas of the district at C.D block/ village level. For each C.D. block, a list of villages serialized by English alphabetical order along with their location code numbers of 2001 and 1991 census has been presented. The rational of giving 2001 location code along with 1991 location code is to facilitate the identification of villages for matching information collected at each Census. The villages, which have been wholly merged in Nagar Nigam, Nagar Palika Parishad and Nagar Panchayat are not included in the list. In case of partly merged villages, the remaining rural part of the villages has been treated as independent revenue village and the data have been presented for such villages in the village directory.

However, the villages treated as outgrowth of an Urban Agglomeration or Nagar Panchayat are listed in the village directory but no data are presented against the name of such villages. All these villages are listed in the Primary Census Abstract (rural) without presenting their data for providing cross references. Uninhabited or depopulated villages are listed but only area of the village and land use pattern is given. A note against such a village indicates the state of its being depopulated or uninhabited.

The village directory brings out some basic information about a village. These data can broadly be classified into the following categories:

1. Population and households Cols.4 & 5
2. Amenities. Cols.6 to 13
3. Other infrastructural facilities etc. Cols.14 to 16
4. Availability of newspaper/magazine Column 17
5. Commodities manufactured Column 18
6. Total area of village and land use pattern Column 3 & 19-23

Town Directory:

The Town Directory covers all the towns in a district. The towns are arranged by English alphabetical order. The data are presented in seven statements serially numbered (I) to (VII).

The following mode of listing of towns has been followed:--

(i) All the towns having statutory status, which are not part of an Urban Agglomeration are listed once in the alphabetical arrangement of the towns.

(ii) All the towns, which are part of an Urban Agglomeration and enjoy independent status of a statutory town are listed twice in the alphabetical arrangement of the towns as well as under the main town of an Urban Agglomeration. However, the data are presented separately only once under the main UA. In alphabetical arrangement a note is given against such towns that they are part of such and such Urban Agglomeration.
(iii) The outgrowth(s) of a town which do not qualify themselves for being treated as independent town are not listed in the main body of the Directory. Against name/names of the town having outgrowth(s) an asterisk (*) has been placed to indicate that the town has outgrowth(s).

(iv) Census towns are also listed in the body of Directory. These are the towns, which do not enjoy statutory status but are declared towns for the purpose of population Census.

Town Directories of the districts give an account of status and growth history of towns, location and physical aspects of the towns, municipal finances during 1998-1999, civic and other amenities up to 1999 (as well in notified slums), medical, educational, recreational and cultural facilities by year 1999, and trade, commerce, industry and banking activities in year 1999. In this way, population and growth rates of towns from 1901 to 2001, density in 2001, sex-ratio during 1981, 1991 and 2001 censuses, rainfall and temperature of the towns, receipts and expenditures in the towns of the district, road length, system of sewerage, number of latrines, method of disposal of night soil, water supply position and fire fighting services, number of electric connections, number of hospitals, colleges, cinemas etc and number of banks as well as commodities of manufactured and imports are enumerated vividly in various statements relating to the town directories of the districts.

The Village Directory:

The Village Directory is the compilation of basic information pertaining to a particular village. The format of the Directory has been revised from time to time but it has been continued to remain as the traditional source of village level basic data. It contains a list of villages with Location Code Numbers, Population, amenities namely Educational and Medical facilities, availability of Drinking Water, Post, Telegraph and Telephone facilities, Commercial and Co-operative Banks, Agricultural and Non-agricultural and other Credit Societies, Recreational and Cultural facilities, Communication, Approach Roads to village, Power Supply and Newspaper/Magazine etc. The name of villages of each Rural Development Block of the District has been arranged alphabetically and location codes number of the Census of India 2001 and corresponding code number of 1991 Census have been given for each village for easy reference.

Generally a ‘village’ is taken as a statutorily recognised unit of an area having definite and recognised boundary and separate land records. Thus in Census the basic unit of rural areas is taken as a revenue village, which has definite surveyed boundaries. A revenue village may comprise several hamlets but the entire village is treated as one Unit for presentation of data. In Mizoram, however, the concept of village is different from what have been mentioned above since there is no surveyed village in the State. Therefore, an inhabited area with locally recognised boundaries and having a name of its own is treated as a village. The uninhabited villages i.e., the villages where no population was found during Census Operations have also been included in the list of villages and C.D. Blockwise in the Village Directory.

Although there is no Panchayat Institution in the District, the villages have Village Councils which are democratically elected local bodies. In addition to the information as to the availability or otherwise of the basic amenities as mentioned in the preceding paragraphs, following nine appendices have also been included:
1. Appendix I Abstract of Educational, Medical and other amenities in villages - C.D. Block level.
2. Appendix II Villages with 5,000 and above population which do not have one or more amenities.
3. Appendix III Land Utilization Data in respect of Census Towns/Non-Municipal Towns.
4. Appendix IV C.D. Block-wise list of inhabited villages where no amenities other than drinking water facility is available.
5. Appendix V Summary showing number of villages not having Scheduled Castes population.
6. Appendix VI Summary showing number of villages not having Scheduled Tribes population.
7. Appendix VII List of villages according to the proportion of the Scheduled Caste and the Scheduled Tribes to the total population by ranges.
8. Appendix VIII Number of villages under each Gram Panchayat (C.D. Block wise)
9. Appendix IX Statement showing number of girls schools in the villages.

Since a large number of abbreviations had to be used due to space problems, a detail and explanatory notes on each of these abbreviations have also been incorporated for easy clarification of the subject concerned.
PART – A

VILLAGE
AND
TOWN DIRECTORY

(SECTION I AND II)
SECTION I
VILLAGE DIRECTORY
Section - I : Village Directory

Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, their amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

The Village Directory format has 23 columns and the details given under each column are for the village as follows:-

Columns 1 : Serial Number
Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.
The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village
The area of the villages in hectares are given. Wherever the area figures were not furnished by the concerned department the column is left blank.

Column 4 : Total population
The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households
The number of households as per 2001 Census is given in this column.

Amenities :
In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc., in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash(-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms.,
5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below:

**Column 6 : Educational**

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below:

(i) Primary School P
(ii) Middle School M
(iii) Secondary School S
(iv) Senior Secondary School PUC
(v) College C
(vi) Industrial School I
(vii) Training School Tr
(viii) Adult literacy class/centre AC
(ix) Others (specify) e.g. Sanskrit O

Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

**Column 7 : Medical**

Availability of medical facility within the village is indicated by following codes:

(i) Allopathic Hospital H
Ayurvedic Hospital HA
Unani Hospital HU
Homeopathic Hospital HHom

(ii) Allopathic Dispensary D
Ayurvedic Dispensary DA
Unani Dispensary DU
Homeopathic Dispensary DHom
(iii) Maternity & Child Welfare  MCW
(iv) Maternity Home  MH
(v) Child Welfare Centre  CWC
(vi) Health Centre  HC
(vii) Primary Health Centre  PHC
(viii) Primary Health Sub-Centre  PHS
(ix) Family Welfare Centre  FWC
(x) T.B. Clinic  TB
(xi) Nursing Home  NH
(xii) Registered Private Medical Practitioner  RMP
(xiii) Subsidised Medical Practitioner  SMP
(xiv) Community Health Worker  CHW
(xv) Others  O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8: Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows:

(i) Tap Water  T
(ii) Well Water  W
(iii) Tank Water  TK
(iv) Tubewell Water  TW
(v) Handpump  HP
(vi) River Water  R
(vii) Canal  C
(viii) Lake  L
(ix) Spring  S
(x) Others  O
(xi) Summer Source  SS

Column 9: Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i) Post Office  PO
(ii) Telegraph Office  TO
(iii) Post & Telegraph Office  PTO
(iv) Telephone Connection  PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i) Commercial Bank  CM
(ii) Co-operative Bank  CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exist is given:

(i) Agricultural Credit Society  ACS
(ii) Non-Agricultural Credit Society  NCS
(iii) Other Credit Society  OCS

Column 12: Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i) Cinema / Video Hall  CV
(ii) Sports Club  SP
(iii) Stadium / Auditorium  ST

Column 13: Communications

If the village is served by any mode of public / private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i) Bus  BS
(ii) Railway Station  RS
(iii) Navigable Waterway  NW

Column 14: Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes:

(i) Paved Road  PR
(ii) Mud road  MR
(iii) Foot path  FP
(iv) Navigable River NR
(v) Navigable Canal NC
(vi) Navigable waterways other than River, Canal NW

Column 15: Nearest Town and distance
The distance is given in kilometres in brackets against the name of the town nearest to the village.

Column 16: Power supply
Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes:
(i) Electricity for domestic use ED
(ii) Electricity for agricultural use EAG
(iii) Electricity for other purposes EO
(iv) Electricity for all purposes EA

Column 17: Newspaper / Magazine
If village receives any Newspaper/Magazines the same is noted in this column using following codes:
(i) Newspaper N
(ii) Magazine M

Column 18: Most important commodities manufactured
The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23: Land use i.e. area under different types of land use
Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:
(i) Government Canal GC
(ii) Private Canal PC
(iii) Well (without electricity) W
(iv) Well (with electricity) WWE
(v) Tubewell (with electricity) TW
(vi) Tubewell( without electricity) TWE
(vii) Tank TK
The village directory also carries the following appendices.

Appendix-I  It gives the abstract of educational, medical and other amenities available in villages C D Block wise of the district.

Appendix-I-A  Indicates number of villages C D Block wise having one or more primary schools.

Appendix-I-B  Indicates number of villages C D Block wise having primary, middle and secondary schools.

Appendix-I-C  Shows number of villages C D Block wise with different sources of drinking water facilities.

Appendix-II  Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A  Indicates list of Census Towns which do not have one or more amenities.

Appendix-III  It gives the land utilization data in respect of Census Towns / non-municipal Towns.

Appendix-IV  C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V  Summary showing number of villages having or not having Scheduled Castes population.

Appendix-VI  Summary showing number of villages having or not having Scheduled Tribes population.

Appendix-VII A  List of villages according to proportion of Scheduled Castes to the total population by ranges.

Appendix-VII B  List of villages according to proportion of Scheduled Tribes to the total population by ranges.

Appendix-VIII  Indicates C D Block wise number of villages under each Gram Panchayat.

Appendix-IX  Shows number of different types of girls school in a village.

## Amenity Status

The table below provides the amenity status for various villages in Jaunpur district. The status is indicated by whether the facility is available within the village or if it is available at a specified distance from the village. Facilities are categorized under different headings such as educational, medical, drinking water, post, telephone, commercial, agricultural, and others. The distances are indicated in broad ranges of 5-10 km and 10+ km from the nearest place where the facility is available.
