PAGODA POINT

Yercaud is on the Servaroyan Hills (Shevaroy Range) in Salem District. It is a quiet pleasant Hill Resort in Tamil Nadu. Pagoda Point is one of the places to visit in Yercaud. Pagoda Point or Pyramid Point named after the ancient pyramidal cairns found here. Around the ridges of the crest are four cairns stones resembling temple towers (Pagodas). In the center of the open space is a shrine dedicated to two anionic stones held sacred by the local Malayalis tribe.

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grassroots level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (VII) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective
of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code number (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the supervision of Dr. C. Chandramouli, Director of Census Operations, Tamil Nadu. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective State Governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S.L. Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
17th October, 2006.
Preface

Publication of the District Census Handbooks (DCHBs) was initiated after the 1951 census and is continuing since then with innovations/modifications after each decennial census. This is the most valuable district level publication brought out by the census organization on behalf of each State Government/Union Territory administration. It inter-alia provides data/information on some of the basic demographic and socio-economic characteristics and on the availability of certain important civic amenities/facilities in each village and town of the respective districts.

The District Census Handbook has two segments: Part A and Part B. Part A primarily deals with village and Town Directory and Part B contains Primary Census Abstract of each village and town of the District. The 1991 Census data presentation both in Part A and Part B of this book was the transition from traditional presentation at Taluk level to CD Block level and this pattern continued in 2001 census as well.

For the first time in 2001 census, the District Census Handbooks are being made available in electronic format.

The District Census Handbook is the joint collaboration of the Census Directorate and the Government of Tamil Nadu. On behalf of the Government of Tamil Nadu, this Directorate has prepared the manuscript of this book.

The District Census Handbooks of 2001 have some additional information which is based on the 2001 census as compared to the previous censuses like capturing of information on participation of women in economic activities, netting all the children in age-group 0-14 as also elderly people of age 60 years and above. The data about the number of handicapped persons including partial disability has also been collected in 2001 census for the whole of India. The most important methodological innovation introduced in 2001 census relate to carving out separate slum enumeration blocks.

The data being presented in this publication have been collected and compiled by Shri M.R.V. Krishna Rao, Deputy Director of Census Operations, Tamil Nadu with the assistance of S/Shri S.K. Srivastav, N. Sukumar Nandagopal and A. Achu Ali, Assistant Directors. For the preparation of manuscript of this book, I received wholehearted co-operation from all the Heads of Departments, Heads of offices of the District / Taluk / Corporation / Municipal / Town and Rural Administration and a number of dedicated and experienced Census staff of this office. I am grateful to all of them for their valuable contribution in the accomplishment of this task of national importance. I must place on record the cooperation extended to me by the press media and electronic media to make the census taking a great success in the state.

I am deeply grateful to Shri J.K. Banthia, IAS the Registrar General and Census Commissioner, India, New Delhi for the valuable guidance and advice at every step till the finalisation of this handbook. I also express my thanks to Shri I.C. Agrawal, Assistant Registrar General (Social Studies Division) and Shri S.L. Jain, Deputy Director, ORGI, New Delhi for preparing the set of instructions for the compilation of the village and Town Directory and other inset tables etc. being inserted in this District Census Handbook.

In particular, it has to be mentioned that the the write up portion was taken up by Shri M.R.V.Krishna Rao, Deputy Director and finalised by Dr. D. Venkatesan, Deputy Director with the assistance of other members of the staff whose names have been mentioned in the “Acknowledgements”.

ANALYTICAL NOTE
Analytical Note

(i) History and Scope of the District Census Handbook

The compilation of District Census Handbook is an innovation of the 1951 Census. District is considered as the most important unit for presentation of Census data. Census Statistics are also compiled for individual villages and towns, as they constitute the basic units of human habitation. Besides this, some other useful information pertaining to the land and the people has also been included in it to make it a self-contained book of reference for the District. It was, however, not altogether a new idea, since census data for smaller units were published in earlier censuses also in one form or the other. For the first time in 1891 District wise list of villages were published giving the population of each village. At the 1911 Census, data of villages were published in the form of village directory. Such village directories were again compiled in the shape of District Census Statistics at the 1921 Census. Finally, District Census Handbooks emerged as regular decennial publication since 1951 Census. The demand for the basic data for the smallest administrative unit was greatly felt in the post-independence era. The ushering in an era of planning and development in the wake of launching of Five year plans after attaining independence, urgent need for detailed data at village level was felt. Thus, when the proposal to bring out District Census Handbook was put before the State Government, they readily agreed for the compilation and printing of District Census Handbooks through their respective Directors of Census Operations, under the authority of local government concerned. The general appreciation and utility of this handbook encouraged the Census Organisation to increase the scope of publication.

The tradition thus built up has been continued in the present series of District Census Handbooks. In the 1971 Census, it had been decided to bring out these hand books in three parts viz; Parts A, B and C. In respect of Tamil Nadu, Parts A and B of this publication had been printed in one volume and part C as a separate volume. During 1981 Census, it had been decided to print it in two parts viz. Parts A and B separately. Part A of this handbook consists of village and Town Directory and part B gives data on Primary Census Abstract (PCA). In 1991 Census also, the same pattern was adopted publishing Parts A and B in a single /double volumes as per the requirement and determining the size of the publication. However, in this census some of the non-census data included are information on girl schools, social forestry areas etc. whereas items like staple food and information on newspapers etc. have been omitted.

In the present Census also, this District Census Handbook is being brought out in two volumes which contain the village and town directory as also the Primary Census Abstract and it should certainly quench the thirst of the planners involved in micro level planning. Similarly, additional data revealing civic and other amenities in class I town has been presented especially in respect of slum dwellers. Scholars and planners alike may benefit from the data on amenities.

(ii) Brief History of the District

The history of Salem District could be traced from the record of struggle between Cheras, Cholas and Pandiyas in Kongunadu in which Salem district was a part. With the decline of the Cholas Empire in the 12th Century, the Hoysalas rose to power and were having control over the area till the 14th Century, followed by the Vijayanagar kings till 1565 A.D. It was the spell of Princely ruling when the Madurai Nayakas came to power in 1623 A.D. Two of the Poligars of Thirumalai Nayak, namely Ramachandra Nayaka and Gatti Mudaliars ruled Salem area. The Gatti Mudaliars was said to have built the Taramangalam temple, noted for its sculptural excellence.

The formation of Salem District in its present form may be noted from the following chronological events.
Some areas totalling about 124 square miles were transferred from Salem to North Arcot (Vellore) and South Arcot (Villupuram) districts in 1885.

There were only the following nine taluks in the district such as Attur, Dharmapuri, Hosur, Krishnagiri, Namakkal, Salem, Tiruchengode, Tirupattur and Uthangarai in 1901.

The number of Taluks reduced to eight consequent to the transfer of Tirupattur to North Arcot District (Vellore) and Namakkal to Tiruchirapalli district. Omalur taluk was created from parts of Salem and Tiruchengode taluks.

The number of taluks increased to ten consequent to the transfer of Salem Taluk from Tiruchirapalli district and formation of new taluk of Rasipuram, which was framed from parts of Salem and Attur taluks.

The number of taluks increased to eleven consequent to the transfer of an area of about 137 sq. miles from Coimbatore district after 1931. The transferred areas was formed into a separate taluk of Mettur. Consequent on the transfer of Kuppam area from Chittoor district to Salem, the boundaries of Krishnagiri and Hosur taluks got slightly modified.

The new taluk of Yercaud was formed from Salem Taluk. Slight changes in Krishnagiri and Hosur taluks also took place during the decade 1931 – 41. Mettur taluk was abolished and portions of it were added to Dharmapuri and Omalur taluks. Some portion of Rasipuram taluk were taken away from it and added to Salem taluk.

Exchange of villages between Mysore and Madras State took place under the Provinces and States (Absorption of enclaves) Order, 1950.

Sankari taluk was formed from Tiruchengode Taluk. Transfer of a few villages from Krishnagiri taluk to Andhra pradesh also took place during this decade 1951 - 61.

In 1965, Salem district was bifurcated into Salem and Dharmapuri Districts in which Salem District has Salem, Attur, Yercaud, Omalur, Sankari, Tiruchengode, Rasipuram and Namakkal (8 taluks) and Dharmapuri District has Hosur, Krishnagiri, Harur and Dharmapuri (4 taluks).

Mettur taluk was formed out of Omalur Taluk with 49 villages and two towns dividing Salem District into nine taluks in 1966.

Transfer of Irugalurpudupalayam village from Tiruchengode taluk to Sankari Taluk took place in 1971-81.

Salem District was bifurcated into Salem and Namakkal districts in 1997 with the following composition.

Salem District: Salem, Yercaud, Attur, Omalur, Mettur, Sankari.

Namakkal District: Namakkal, Tiruchengode, Rasipuram and Paramathi Velur.

New taluks were created as detailed below:

- 34 villages were transferred from Attur taluk to newly formed Gangavalli taluk.
- 25 villages were transferred from Sankari taluk to newly formed Idappadi taluk.
- 2 taluks were transferred from Salem to newly formed Attur division in 1998.

Salem Division: Salem, Yercaud.

Attur Division: Attur, Gangavalli.

33 villages of Estate Manager Ofice, Salem, transferred newly formed Valapady taluk in 1998.

(iii) Administrative Setup

The district is divided into four Revenue Divisions and nine taluks as given below:

The district comprises three Municipalities, one Municipal Corporation, 20 Panchayat Unions, 34 Town Panchayats and 385 Village Panchayats. The Total number of villages in the district being 646.

Salem District is divided into 12 Assembly Constituencies and one Parliamentary Constituency. Of the Assembly Constituencies, one is reserved for SCs and one for STs. They are Salem I, Salem II, Veerapandy, Panamarathupatty, Yercaud (ST), Omalur, Tharamangalam, Mettur, Attur, Thalaivasal (SC), Edapadi and Sankari (SC). The Parliamentary Constituency Omalur, Yercaud, Salem I, Salem II, Veerapandy, Panamarathupatty.

Mettur and Tharamangalam Assembly segments are attached to the Dharmapuri Parliamentary
Constituency. Attur and Thalaivasal Assembly Constituency are attached to Rasipuram Parliamentary Constituency. Edapadi and Sankari Assembly Constituency are attached to Tiruchengode Parliamentary Constituency.

Table given below explains the administrative structure of the district.

Note: Mallasamudaram C.D Block spreads over two districts viz. Salem & Namakkal.

(iv) Physical Features

Salem district lies between 11°14' and 12°53' in the Northern Latitude and between 77°44' and 78°50' in the Eastern Longitude.

Physiography

Salem District with an area of 5205 Sq km is extensively covered with hilly ranges and rocks with undulating plains. The Kalrayan range hills with its peak upto 1493 metres occupies the Northern part of Attur Taluk. The northern portion of this range is called Chinna Kalrayan and southern portion is called as Peria Kalrayan. The average height of the northern portion is about 2700 feet and the southern portion is over 4000 feet. A part of Pachamalai hill is situated in the southern portion of Attur Taluk whose peak rise upto 1067 metres.

The Siddamalai is in the West of Omalur Taluk, near Mettur Dam. The Palamalai is in the west of Mettur. The Kanchamalai is a rough ridge of about 7 km in length and about 3 km in breadth and lies 8 km southwest of Salem. This ridge contains plenty of iron ore. The Shervaroyan hills covering an area of 256 sq kms for a length of about 45 kms, width of about 30 kms and 1523 metres high, occupies the entire Yercaud Taluk, which is the hill resort of Salem district. Besides, there are number of hillocks like Perumalmalai, Chemmanbukaradu, Koodamalai etc.

Drainage

The important rivers in the district are Cauvery, Vasishta Nadhi, Sweda Nadhi and South Pennar. The Cauvery enters the district at the North-western corner of Omalur taluk and then flows towards south between Palamalai and Thensithamalai, where it is dammed to form the biggest reservoir of the State, viz., the Mettur Dam. The chief tributaries of the Cauvery are the rivers Shahrbhanganadi and Thirumanimuthar.

The Vasishta Nadhi and the Sweda Nadhi flows across Attur Taluk into Villupuram district and draining the area between Kalrayan hills and Pachamalai Hills. The Vasishta Nadhi flows in the northern side of the two rises in the Aranoottumalai in Salem Taluk. The Vasishta Nadhi and Sweda Nadhi join together in Villupuram district and takes the name of Vellar.

Vanier rises in Shervaroyan in Yercaud. It joins the Pennar below its confluence with the Pambar. Irrigation in Salem district from Mettur reservoir is marginal.

Flora

Of the total area, about 123038.79 hectares (26.93%) of the district comes under forests. The trees found in these forests are mostly good fuel yielding, of which the following are most commonly found in the district.

</tbody>
</table>

In the un-reserved forest also, fuel trees are commonly found. The most common type of trees seen is Tamarind. In the Southern taluks, palmyras are seen in both cultivated and un-cultivated waste lands.

**Fauna**

The common domestic animals found in the district are cows, bullocks, sheep, goats, dogs etc. In the southern taluks, propagation of the Kangeyam breed is widely popularised. Among the sheep varieties, the Mecheri ram is famous. Tigers and panthers live in small numbers in all the jungles. The other wild animals found in the forests are the jungle cat, civet cat, wild pigs, bison, sambur, langur, hyenas, wolves, foxes etc.,

**Climate**

The climate of the district varies according to the altitude. The hottest months of the district are March, April and May. It declines to some extent on the out-break of the South-west monsoon in the month of June. The temperature in September is oppressive. The winter season falls between middle of November and middle of February which is chill but enjoyable. The Shervaroyan Hills in Yercaud taluk and villages located in the Pachamalai hills have a very pleasant climate with a mild temperature throughout the year. Due to general dryness of the atmosphere with cool nights and the appreciable drop in temperature from June following the onset of the monsoon season, the climate of the district is more pleasant than that of the adjoining eastern and southern districts. A year may conveniently be divided into four main seasons.

The dry season from January to March, the hot season during April to May, the south west monsoon from June to September and the north east monsoon from October to September. The meteorological observatory is located in Salem and provide various meteorological data of the district.

The district on the whole has a dry climate. The driest months are from January to middle of April and the average relative humidity in the afternoon is less than 40%. Even during the rainy months, the average humidity is below the saturation level.

Skies are generally clear or thinly clouded during the period January to middle of April. The cloudiness increases from the later half of April and after the middle of June, skies are generally thickly clouded till about the middle of December.

From October to March, wind flows mainly from north easterly direction. In April, wind flows between South and West. The wind speeds are least in October with a secondary minimum in May. It is interest to note that maximum primary and secondary rainfall occur in these months. Because of its interior location, the district is not directly affected by cyclonic storm and depressions in the Bay of Bengal, which nevertheless influence the rainfall over the district during the north-east monsoon season.

During the period from March to June, dust storms occur occasionally. Through out the monsoon months, rain is often accompanied with thunder storms and rarely with hail.

The rainfall seasons in the district can be grouped into three, viz., the summer rains, the south-west monsoon rains and north east monsoon rains. The summer rains are in the months of April and May. Heavy showers accompanied with thunder occur during this period. The south-west monsoon is usually very weak in the district. About 5 to 6 inches of rainfall are received during this period from the middle of June and August. The north-east monsoon occurs in the month of October and November and gives
about 20 inches of rainfall. Actual rainfall recorded in 1999-2000 in Salem District is 1020.4 mm as against the normal rainfall of 1031.9 mm.

In 1999-2000, Salem District received 1020.4 mm of rainfall as compared to a normal of 1031.9 mm. The table below gives the actual and normal rainfall in the District during the South West, North East monsoon, winter and hot weather season in 1999-2000 (in mm).

**Forests**

Salem district has a fairly extensive forest area of considerable value, particularly in the hilly ranges. The forest area cover an extent of 123038.79 hectares, constituting 26.93% of the total area of the district. They are distributed in almost all the taluks of the district. These forests contain deciduous species with thorny under growth. The main products from the forests of the district are Sandalwood, bamboo, timber (Silver oak and similar varieties) and fuel. The forests are generally developed for supply of timber, fuel, bamboo grazing and minor forest produce in accordance with the prescription of the working plans for systematic forestry. Sandalwood and bamboo are utilized within the district for extraction of Sandalwood oil and manufacture of paper respectively. The timber is partly used by sawmills and carpentry shops for body building trucks and lorries.

The natural growth of Forests in the Yercaud taluk are protected under the Tamil Nadu Hill Station Preservation of Trees Act, 1955.

Most of the sandalwood extraction and raising plantations inside reserved forests are carried out by the Malayali tribes of Yercaud.

With the social forestry programmes in Government lands, the forest department has enlarged its activities.

The main source of the revenue from the forest is from Sandalwood trees which occur naturally in abundance in plateau and hilly ranges of the reserved and un-reserved forests. Only dead sandalwood trees are extracted from the area prescribed for such extraction.

**Minerals and Mining**

Major portion of the mineral wealth of Tamil Nadu is confined to Salem District, where a variety of mineral deposits are found. Of these, the most important are magnesite, bauxite, lime stone, iron ore, quartz and feldspar.

**Iron-ore:** The best known deposits are found in the Kanjamalai, a prominent hill about 8 kms southwest of Salem Town. It is oval in outline, measuring 7.2 kms in length and 4.0 kms in width. There are three main magnesite quartzite bands, the largest of which is 18.3 to 30.5 M thick while the other two averages about 9.1 M. The estimated reserves are of the order of 55.48 million tonnes upto a depth of 30.5 m. In Godumalai, the total quantum of ore is estimated to be 12.7 million tonnes upto a depth of 30.5 meters.

**Magnesite:** The largest and most important deposit of magnesite in India is located near Salem and is known as “Chalk Hill” in an area of 18 to 21 sq.km. The mineral is mainly confined to two areas separated by country rock. The principal use of magnesite is in manufacture of refractories, magnesium salt, ceramic chemical compounds and magnesium metals and alloys. Occurrence of magnesite has also been reported and mined from Siranganur and Keriippatti.

**Dunite:** Fresh dunite, used for refractories, are found to occur in association with magnesite in Chalk Hills, Salem.
Lime Stone: Lime stone is reported from various places in Sankari taluk. Most of the lime stone deposits are of cement grade and are mined for cement production by India Cements Limited, Sankari. A small quantity of the lime stone is utilised for manufacture of bleaching powder, soda ash, calcium carbide, calcium cyanide etc.

Quartz and Feldspar:
These are reported from Vellakalpatty, Avadathur, Virudhasampatti, Chittoor, Veerakkal, Kongupatty, Arurpatty, Kuttapatty and other places. Total reserves of known and proved occurrences are 3.5 to 4 million tonnes of quartz and 1.5 to 2 millions tonnes of feldspar. The quartz and feldspar are being exploited for glass, abrasives and ceramics.

Soap Stone: Soap stone occurs as an alteration product of ultramatic rocks at a number of places and is mined for use in making utensils, idols and toys. Occurrences of soap stone are reported from Periasooragai, Aranganur, Kongupatti and Pottaneri.

Bauxite: In the Shevaroyan hills, six bauxite occurrences are known and at present the Madras Aluminium Company Ltd., is exploiting the bauxite from aluminium production located at Mettur. The total reserves of bauxite in the Shevaroyan Hill are estimated to be of the order of 5.3 million tonnes, the alumina content varying between 30 - 52 percent.

Soil
The soil in the district is generally black clay, mixed or black loam, black sand, inginous and red sand or gravel. The black soil is considered most fertile. It absorbs moisture from the atmosphere and retains it. The red sandy soil are equal to loams in productivity. In and around Attur, the soil is almost black due to alluvial deposits with red sub-soil.

Cropping pattern
Salem district is geographically a dry tract. Among the net area, the area under irrigation was 44% and the source of irrigation is mainly through wells. The remaining 56% reported as rain-fed field. Out of the total area under cultivation, food crops occupy nearly 61% and the oil seeds used for food purpose is 20%. The major cereals raised are paddy, cholam, ragi and cumbu. Pulses are predominantly cultivated in rain fed area either as mixed crop or single crop. Among oil seeds, ground nut, castor and gingelly are the most important crops. Among the commercial crops, cotton is the major crop and major area cultivated in Attur. Now-a-days, castor is getting popularised among farming community.

The main occupation of the people in Salem district is agriculture; either as cultivators or as agricultural labours. The cultivation depends upon wells and tanks, though one of the biggest reservoir, Mettur dam, is located in this District. Irrigation from the reservoir is marginal through the west bank canal of the Cauvery. Ground nut cultivation is generally undertaken as a rainfed crop, sometimes it is also cultivate and as a irrigated crop after the harvest of paddy.

There are two State Seed Farms in Mettur and Danishpet for distribution of high yielding variety seeds to the farmers. Since the State Seed Farms do not have the capacity to meet the full requirement of high quality seeds, the Agriculture Department runs quality seed farms in private holdings under its direct supervision and the good quality seeds are certified.

There is a separate seed farm for coconut seedling production in Danishpet. A coconut crossing centre is established in Salem Division, where hybrid coconuts are produced.

Land and Land use Pattern

Source: Village Records
Out of 521974 hectares of the district, 87.53% identified as rural areas and 12.74% as urban areas.
ANALYTICAL NOTE

Of the 456870 hectares of rural areas, 26.93% covered with forest, 17.69% irrigated, 36.38% unirrigated, 5.54% cultivable waste and 13.46% area not available for cultivation.

Agriculture

Paddy is grown both as wet and garden crop. Paddy is raised as wet crop under river channels and tanks. Cultivation of paddy is popular especially after the introduction of electrical motor pumpsets. There are different seasons or pattern of cultivation of paddy. The main season is Samba which is followed by Navarai and then by Kar crop.

Cultivation of Navarai crop depends upon the summer water supply during the season. Otherwise, the area will be diverted to other crops.

Millet is cultivated mostly under rainfed condition. Even a large extent of ragi crop is raised as Manavari crop in the District. Pulses are also raised mostly as rainfed crops. They are grown mostly as mixed crop alongwith millets.

Groundnut occupies a major area among oil-seeds. It is raised as a Manavari crop. Castor is grown mostly as a mixed crop alongwith cotton and groundnut. Cultivation of Castor as a single crop is very rare. Gingelly is sown in two seasons, as a rainfed and irrigated crop. Cotton is sown in two seasons. The first season begins in September to October (Purattasi Pattam) and the second in February to March (Masi Pattam).

Usually, paddy is cultivated as a single crop without being rotated with other crops in wet lands. In high level wet land, however, paddy is grown in rotations with other crops like sugar-cane and banana. Sugarcane is grown once in three or four years and paddy in the intervening period.

Ragi is rotated with cholam or paddy. Cholam, groundnut followed by Samba Paddy is another rotation followed in some garden lands. Cotton is followed by another cotton crop though sometimes, it is rotated with Samba paddy.

The wet lands are cropped almost throughout the year. In dry lands, the land is usually left fallow until the next North-East monsoon season.

The dry land is not usually manured but once in four or five years, it is manured with cattle manure. Application of compost to dry lands is resorted to by some progressive cultivators. The wet land is regularly manured with green leaves and chemical manures. Cotton crop is regularly top dressed with ammonium sulphate, urea, potash. Apart from these, other fertilisers like Urea is also.

The following Table gives the area under different crops and their production during 1998-99.

There are 13 regulated markets in Salem District.

Horticulture

The area under fruit trees and vegetables is large in Salem Taluk.

In 1998-99, the area under various horticultural crops was as follows:

<table>
<thead>
<tr>
<th>Crop</th>
<th>Area in Ha</th>
<th>Production in MT</th>
</tr>
</thead>
<tbody>
<tr>
<td>Banana</td>
<td>1,508</td>
<td>54,306</td>

</tbody>
</table>
Sericulture

The total area under mulberry cultivation as on 1.4.2000 was 283.44 hectares. The total production of reeling cocoons was 1.560 MTs, which was valued at Rs. 156.00 lakhs. The production of raw silk in the same year was 0.164 MTs valued at Rs.197.05 lakhs.

Rural Water Supply

As on 1.4.2000, there were 3,017 fully covered habitations and 194 partially covered in Salem District. Thus, a total of 3,211 habitations had been covered under the rural water supply scheme.

Irrigation

The main source of irrigation is Cauvery river. number of streams, tanks and wells are also used for irrigation. The net irrigated area in the district in 1998-99 was 1,11,566 hectares and the net area sown was 2,53,669 hectares, i.e.,43.98% of the total net area sown was irrigated in the district.

The number of irrigation wells reported was 1,20,659 and they irrigated 1,33,435 hectares as gross area in the district. In Salem district there were 546 tanks, 70 canals and 6,705 tube wells in 1998 – 99. Majority of the land in the district is dry and the crops are mainly rainfed. The tracts generally have poor rainfall during the south-west and north-east monsoon. Major sources of water supply for irrigation in this District during 1998-99 are as follows

<table>
<thead>

Animal Husbandry

Salem district being an agricultural tract, animal husbandry acquires special importance. The district has immense cattle wealth.

Dairying is taken in a big way by the farmers and others. Cross breed cows being reared, namely, Holstein, Freesian and Jersey cow by the farmers. The average milk yield of the cow is about 8 litres. Buffaloes are also maintained by the people. Graded Murrah buffaloes and indigenous breeds are maintained. The average milk given by a buffalo is about 6 litres. Green fodder and straw are fed to the cattle. Tapioca waste is also used by some for feeding the cattle. Halikar and Kangeyam bullocks are being maintained by farmers for ploughing and other purposes. Some indigenous bullocks are also seen in Salem District.

Mecheri breed sheep is famous in Salem District. This breed is maintained for mutton. Mecheri breed is suited for temperate climate. Indigenous goats are being reared by farmers and other people to improve their economic status. Goats are reared mainly for mutton. Goats are supplied to people below the poverty line at subsidised rates by the Animal Husbandry department through various schemes.

Some people in the district rear pigs to improve their economic status. Few rear white yorkshire pigs also.

Some people have broiler farms too. A modernised and scientific broiler farm is located near Vazhapadi of this district. A cattle breeding and fodder development unit under the control of Deputy Director of Animal Husbandry is functioning at the Veterinary Hospital, Salem.

The district has an animal disease intelligence unit at Salem to diagnose the various diseases outbreak and to advise the veterinarians in the field to take preventive vaccination to cattle. Besides, there is one clinician centre and 6 Veterinary Hospitals and 43 Veterinary Dispensaries to take care of the health of animals in the district.

There are 68 veterinary subcentres in the remote areas of this district to inseminate the cattle and to give first-aid treatment to the animals. All the above veterinary institutions are functioning under the control
of Assistant Director of Animal Husbandry, Salem and Omalur. One Deputy Director of Cattle breeding and fodder development office functions at Salem to look after the supply of frozen semen to all the Veterinary institutions in the District. They also look after the fodder development work in the district. In addition to that, there are 6 mobile veterinary units in the district to treat the animals. The veterinary Assistant Surgeons working at the Panchayat also has 20 mobile veterinary dispensaries in each panchayat to take care of the health of the animals.

The table given below show the number domestic animals reported upon during 1998-99 in the district.

Fisheries

Mettur reservoir and the other inland water sources in the district contribute a total fish production of 220,316 tonnes annually. The Mettur reservoir across the Cauvery (which is one of the biggest reservoir with a water spread of about 15,540 hectares) has been developed by the State fisheries department during the past four decades. Fast growing fish fingerlings of the Gangetic carps like catlas, Rohu etc are stocked regularly and fishing is regulated by the issue of licences to fishermen. The Yercaud lake in Shervaroyan hills provides the cold water fishery resources. Fishes like Mirior Carp, Common carp etc., are cultured here.

A Fish farm with an induced carp spawing centre has been established at Mettur Dam by the State Fisheries Department for the production and supply of quality fingerlings.

The Mettur Dam fishermen co-operative marketing society procures fish from the reservoir and provides means of marketing. Besides retail marketing at Mettur Dam, the society also sends fish to markets in the other parts of the State. Cauvery runs as a boundary of the district in the west and south. Fishing communities living along the river margin are engaged in catching fish. Different varieties of fishes are reared at the Mettur Reservoir. Ice plant and cold storage facilities have been provided at important places in the district. Nearly 2575 tones of fish were caught during 1998–99.

Industry

Handloom Industries occupy a pivotal place in the economy of Salem District as it provides livelihood for several lakhs of people. The handloom census taken in 1995 – 96 disclosed that there were 51260 looms in the district. About 50% of these looms were under the Co-operative Society and the rest were in the private sector.

All varieties of handloom fabrics are produced in the district which are very famous all over the country. The use of art silk yarn for making border and heading of higher count sarees and the use of dhoties for producing designs in the border is very common. “Salem Gundanchi” dhoties containing pure coloured silk yarn in the border and head is much in demand for ceremonial occasions and marriages. The major items of production in the district are pure silk sarees, dhoties, cotton sarees and dhoties, towels, bed sheets and carpets.

Under the Co-operative Society, there were 97 Weavers Co-operative Societies functioning in the District. About Rs.28 crores of handloom cloth were produced annually under the co-operative sector. Among the cotton societies in the district, Ammapet Weavers Co-operative society is the biggest one. The major production of the society are cotton sarees, Bed sheets, towels, pure silk sarees, dhoties, angavastrams and shirting material. The annual production in this society is about Rs..2.40 crore. Salem district is well known for its traditional silk dhoties, silk shirting and angavastram, woven in handloom. Among the silk societies in the District, Salem Weavers’ Co-operative Society is the biggest one. The annual production in this society is Rs.7.60 crores.

The Silk Weavers Co-operative Societies in the district are also famous for low cost silk sarees production. Among the silk societies, J.O Kondalampatti silk, Murugan silk and N.Mettur silk are very famous for their exclusive production of pure silk sarees.
Marketing of handloom goods is done through the various outlets of Co-optex. About 38 crores of handloom cloth are sold annually. Apart from that, the Department of Handloom and Textiles have also opened direct sales show rooms to increase their sales.

The designing of the Salem Steel Plant visualises and integrated special steel plant to produce 2,25,000 tonnes of finished sheets. The project, namely the cold rolling mills, with an investment of Rs.167 crores was inaugurated in September 1981 on an extent of 62,000 Sq.mts. The stainless steel coils and sheets using sophisticated technology in cold rolling.

About 6000 families were engaged in mat weaving in this district. The most popular variety of mat woven here is called the Bazaar mat. These are marketed mostly in Bangalore. There were 25 mat weaving co-operative societies established by the Government. Bamboo basket weaving is a common handicraft in the district. The baskets are used for packing purposes by agriculturists.

Village Industries have also been reported and 20,000 people were engaged in various types of village industries in this district. As the magnesite deposits in Salem District is larger, some of the companies engaged in this field are Salem Magnesite Private Limited, Burn’s Company Ltd., Dalmia Magnesite Corporation, Belphahar Refractories Ltd., etc., They are engaged in mining, cobbng and sorting process and they employ about 7500 workers. The magnesite is mainly exported to U.S.A, and Japan. They also manufacture refractories to meet domestic needs of the country.

The Madras Aluminum Company set up a factory has to manufacture aluminum from bauxite mined in the Shevaroyan hills with installed capacity of 10,000 tonnes per annum.

India Cements Ltd., has established a Cement factory at Sankari Durg, where lime stones are available in plenty. The installed capacity of this factory is 1,67,000 tonnes of Portland cement. The factory was started in 1963. The India Cements Private Limited has put up a factory at Mettur dam to produce PVC resins and compounds.

The Mettur Chemical and Industrial Corporation Ltd., has established factories at Mettur Dam. They manufacture caustic soda, bleaching powder, Liquid Chlorine, Hydrochloric acid, Lime, Bleach liquor, aluminium sulphate, calcium chloride, potassium chloride, vansapathi, refined oil, washing and toilet soaps. The manufactured products are marketed through out India.

Shervary Bauxite products company have established a factory at Yercaud for manufacturing synthetic emery from bauxite. The finished product is marketed through out India. The installed capacity of the factory is 1780 tonnes of synthetic grains and 15,600 Kgs of grinding paste per annum.

The South Indian Glass and Enamel Works Ltd., at Ammapet near Salem is manufacturing white and amber coloured glass ware. The installed capacity of the factory is 3,000 tonnes per annum.

There are four flour mills in Salem viz., Salem roller flour mills, Salem food products, Krishnappa Roller Flour mills and Narasus Roller flour mills. They produce large quantity of wheat products and supply to the needs of the people of Salem and neighbouring districts.

Rice mills, sago industries, Art silk twisting factories and power loom factories are the small scale industries in the district.

Though there are a large number of rice mills in the district, only a few of them are engaged in manufacture of parboiled rice. The big rice mills are located mostly at Salem and Attur.

About 17357 hectares of Tapioca was cultivated during 1998-99. Sago factories have been established in a bigway in the district. There are more than 747 Sago factories spread over mostly in Attur and Salem Taluks. In order to ensure the production of high grade quality starch, the State Government has established a Sago Research Institute at Salem.

There are about 1800 Power Loom and 30 Cotton type manufacturing factories in Salem District.

Trade and Commerce

Rice and cloth are the major source of trade in the district. The inland trade is restricted to Sago, Power Loom and Handloom Textiles, Rayon, Silk Sarees, Bamboo Baskets, Chemicals, Ayurvedic Medicine, Korai Mats and Vegetable Oils.
The following items Cotton, Sugarcane, Yam Dyes, Bamboo, Thread, Dhall and Yarn are imported from various places to Salem. Bauxite, Dhothies, Coconut, Bamboo Baskets, Handloom Cloth, Powerloom Cloth, Art Silk and Kada Cloth are exported to various places from Salem.

There are a number of Banks, both Public Sector and Co-operative Sector in the district to cater to the needs of the trading community.

Fair Price Shops

In this District there were 1030 full-time and 104 part-time fair price shops. There were also 7 women fair price shops in the district.

Transport and Communication:

Salem, the headquarters of the district is served by the Southern Railway network. Salem is directly connected with Mangalore, Trivandrum, Bangalore, Bombay, Chennai and New Delhi, by broad guage. New broad guage line from Salem to Bangalore via Dharmapuri was introduced in the year 1999. By metre guage, Salem is connected with Mettur dam and Virudhachalam, a junction in the Chord line between Chennai Egmore and Tiruchirapalli. The doubling of the line from Jolarpet to Erode has greatly facilitate free movement of passenger and goods traffic in this line.

The district has a well knit road system of more than 6024.796 kms. Salem is located on three National Highways, viz., NH-7 (Bangalore – Kanniyalumari), NH-47 (Salem – Cochin) and NH-68 (Salem – Ulundurpet). All the Taluk Headquarters, other towns and most of the villages are connected by motorable roads. The State owned 949 buses and private operator run about 148 buses provide transport agencies on both long distance and local routes.

All important towns have telephone exchanges and Post Offices in the district. Wherever road crosses rivers and important jungle streams, good bridges have been constructed to facilitate smooth traffic throughout the year. The South Pennar and cauvery rivers also have bridges at all places where important roads cross them.

There were 17,921 commercial vehicles and 2,67,132 non-commercial vehicles registered in Salem District in 1999-2000. The following table gives the detail.

Bus Stop and Railway Stations

All towns and 428 villages (out of 557) in this District have bus facilities. There are also 24 Railway Stations in the District.

The Table below gives the comparative picture of this facility in villages between 1991 and 2000.
Electricity

Commendable progress has been recorded by the district in the field of electricity generation. The only place in the district where power is generated is at Mettur Dam. The water from the sluices in the dam is utilised to develop power. This is perhaps the smallest hydro power station the state but the generation is continuous. As the full potential of the reservoir has not been utilised for power development, the Government have taken up the execution of another scheme here, called the Mettur Tunnel scheme. The entire water let out for irrigation from the reservoir is taken through a tunnel, dug at the extreme left end of the dam and power generated.

All the villages and towns in Salem District are electrified, supply of electricity to houses, industrial undertakings and factories have been increased to a great extent.

About 67,382 street lights and 88,872 agricultural pumpsets were energised and there were 33,559 industrial services, 2056 OHT Service and 62,195 hut service connection were provided in this Salem District as on 31.3.2000.

Education

Salem district has comparatively low literacy in the State. In the district, there are 11 Arts and Science Colleges, 3 Engineering Colleges and 2 Medical Colleges. In Salem Taluk, an Engineering Colleges, a Medical College and Arts, science College have been opened by the Vinayaka Mision Institution for the benefit of students. A polytechnic established in 1960 is functioning since 1960.

A new University called Periyar University was started in 1997 at Salem. The Periyar University is situated on the Salem – Bangalore Highways road, 45 Colleges function under the University; 12 Engineering and 33 Arts Colleges.

Every village in the district now has a high school within a distance of 8 kms. During the decade, more amenities were provided in schools and the living conditions of teachers improved. The mid-day meals scheme introduced during the second plan period has increased the attendance in schools. The school improvement scheme has gone a long way in providing free clothings, books and slates to the poor pupils, securing equipments, books for the libraries, buildings, play grounds, utensils and other amenities required for the schools.

Number of Education Institutions in the District during 1999

<table>
<thead>

There are 1482 primary schools (1074 in rural areas and 408 in urban areas), 390 middle schools (233 in rural areas and 157 in urban areas), 223 secondary schools (118 in rural areas and 105 in urban areas), 123 senior secondary schools (51 in rural areas and 72 in urban areas), 6 colleges (all in urban areas), 3 industrial schools, 4 training schools (both in rural area) and 1 other literacy centres in the District. Only 65 villages in the District had no educational facility.

Noon Meal Centres

There were 3142 nutritious meal centres operating in this District in 1999-2000. The total number of children benefited under the scheme in the same year was 21964. Of this, 130776 in the age group of 5-9 years and 79055 were in the age group of 10-15 years. The details of the number of Centres is as follows:

Health

The district enjoys a temperate climate which is generally good for healthy living. The hilly areas, however, were infected with Malaria. But, due to implementation of National Malaria Eradication Programme, this scourge has been completely eradicated. The tribal and other people living in the hills are now completely free from Malaria. The achievement under Public Health schemes during the last 20 years are noteworthy. Under Guins worm eradication scheme, wells were chlorinated and health staff were appointed for this purpose.

The Medical facilities available is given in the Table

</table>

It was reported that 557 inhabited villages in the District have phone facilities which account for 89.6% coverage.

Commercial Banks

There were 168 commercial bank branches in this District as on 31.3.1999; 67 were located in rural areas and 31 in semi-urban areas. The deposits as on the same date was Rs.1555.21 Crores. In addition, there were 49 co-operative banks in rural areas; 182 agricultural credit societies and 336 non-agricultural credit societies and other credit societies in the District.

Police

There were 32 police stations and all women police stations and 8 fire stations in this District.
(v) Census Concepts

Building

A ‘Building’ is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant’s room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office, etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant’s household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A ‘census house’ is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non-residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel / hotel building was treated as one census house. But if such built at different times and owned by different persons.
In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, ‘singleness’ of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably; the entire hostel/hotel building was treated as one census house, but if such hostels/hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household’s residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant’s quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban
areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:
   i) A minimum population of 5,000;
   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and
   iii) a density of population of at least 400 per sq. km. (1,000 per sq. mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A ‘household’ is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common

spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases, railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

City

Towns with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban
kitchen. There may be one member households, two
member households or multi-member households.

**Institutional Household**

A group of unrelated persons who live in an
institution and take their meals from a common kitchen
is called an Institutional Household. Examples of
Institutional Households are boarding houses, messes,
hostels, hotels, rescue homes, jails, ashrams,
orphanages, etc. To make the definition more clearly
perceptible to the enumerators at the Census 2001, it
was specifically mentioned that this category or
households would cover only those households where
a group of unrelated persons live in an institution and
share a common kitchen.

**Houseless household**

Households who do not live in buildings or census
houses but live in the open on roadside, pavements, in
hume pipes, under flyovers and staircases, or in the
open in places of worship, mandaps, railway platforms,
etc., are treated as Houseless Households.

**Scheduled Castes and Scheduled Tribes**

Article 341 of the Constitution provides that the
President may, with respect to any State or Union
territory, specify the castes, races or tribes or parts of
or groups within castes, races or tribes which shall for
the purposes of the Constitution be deemed to be
Scheduled Castes in relation to that State or Union
territory. Article 342 similarly provides for specification
of tribes or tribal communities or parts of or groups
within tribes or tribal communities which are to be
deemed for the purposes of the Constitution to be
Scheduled Tribes in relation to the various States and
Union territories. In pursuance of these provisions, the
list of Scheduled Castes and/or Scheduled Tribes are
notified for each State and Union territory and are valid
only within the jurisdiction of that State or Union
territory and not outside. In September 1956, by an
amendment, the Presidential Order of 1950 and in all
subsequent Presidential Orders relating to Scheduled
Castes, the Hindu and the Sikh religions were placed
on the same footing with regard to the specification of
Scheduled Castes. Later on, as per the amendment
made in the Constitution (Scheduled Castes) Order
1990, the Hindu, the Sikh and the Buddhist were placed
on the same footing with regard to the recognition of
the Scheduled Castes.

</table>
Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age-group seven years and above. For different age-groups the percentage of literates in that age-group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non-worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census, a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person, who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or
a combination of both (agricultural labourers) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person, who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry, is termed as 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all States.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those
carrying both sewage and storm water are called combined sewers. However, in some towns, which are not provided with such underground sewerage system, it is served by open surface drain, box drain, silk pattern drain, etc., in these towns.

Type of latrine and method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz.:

(i) underground sewerage,

(ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and

(iii) dry type of latrines with manual scavenging. The street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the fecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist, these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child-bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

\[
\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1,000
\]

Crude death rate (CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

\[
\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1,000
\]

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age-group normally expressed per 1,000 women.

\[
\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1,000
\]
Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age-group normally expressed per 1,000 married women.

\[
ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1,000
\]

General fertility rate (GFR)

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

\[
GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1,000
\]

General marital fertility rate (GMFR)

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

\[
GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1,000
\]

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

\[
TFR = \frac{5 \times \sum_{15-19}^{45-49} \text{ASMFR}_{15-19}}{1,000}
\]

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

\[
TMFR = \frac{5 \times \sum_{15-19}^{45-49} \text{ASMFR}_{15-19}}{1,000}
\]

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1000 population of the same age-group.

\[
\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1,000
\]

q1

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2

Probability of dying between birth and age 2.

q5

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (USMR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

\[
\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1,000
\]
Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

**Neo-natal mortality rate (NMR)**

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

\[
NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1,000
\]

i) **Early neo-natal mortality rate**

Number of infant deaths of less than 7 days during the year

\[
= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1,000
\]

ii) **Late neo-natal mortality rate**

Number of infant deaths of 7 days to less than 29 days during the year

\[
= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1,000
\]

**Post neo-natal mortality rate (PNMR)**

Number of deaths of 29 days to less than One year during the year

\[
= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1,000
\]

**Peri-natal mortality rate (PMR)**

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

\[
PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1,000
\]

**Still birth rate (SBR)**

\[
\frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1,000
\]

**Maternal mortality rate (MMR)**

Number of deaths of women in the age-group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

\[
MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live births}} \times 1,00,000
\]

**Eligible couple (Couples per 1,000 population)**

Number of currently married females in the age-group 15-44 years per 1000 persons of all ages.

**Child woman ratio (0-4)**

1. Number of children in the age-group 0-4 years per 1000 women in the age-group 15-49 years.

**Child woman ratio (5-9)**

2. Number of children in the age-group 5-9 years per 1000 women in the age-group 15-49 years.

**Migration, Internal and International migration, Impact of migration.**

**Migration**

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the Census is other than the place of his birth. Similarly
a person is considered as a migrant by place of last residence if the place in which he is enumerated during the Census is other than his place of immediate last residence. By capturing the last of the migrations in cases where persons have migrated more than once, this concept would give a better picture of current migration scenarios.

Internal And International Migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (interdistrict migration) (ii) Migration from one state to another state of the country interstate migration (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

Impact of Migration

As in 1991 and 2001 Census, like previous Censuses, had collected migration details for each individual by place of birth and last residence. Data on last residence along with details like duration of stay in the current residence and reason for migration provides useful insights for studying migration dynamics of population.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA / town

Size-class of UA / Town is based on the population. UAs / Towns with 100,000 and above population are classified as Class I UAs/Towns. These Class I UAs / Towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are:

- M7 (5,000,000 and above);
- M6 (2,000,000 to 4,999,999);
- M5 (1,000,000-1,999,999);
- M4 (500,000-999,999);
- M3 (300,000-499,999);
- M2 (200,000-299,999); and
- M1 (100,000-199,999).

Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as:

- a) Areas where buildings are in any respect unfit for human habitation; or
- b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city

The concept of ‘Mega city’ is a recent phenomenon in the Urban Sociology and is defined in terms of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.
Analytical Note

(vii) Census 2001 Findings

Census taking is a massive operation carried out in a short span of time with the active participation of a veritable army of enumerators. The reference moment for the 2001 Census is the midnight of 28th Feb. 2001 i.e. the census provides a snapshot of the population of the country, as it existed at the midnight of 28th Feb. 2001. Actual enumeration was spread over a period of 20 days from 9th Feb. 2001 to 28th Feb. 2001 followed by revisional round up to 5th March 2001 for updating the population figures with reference to the midnight of 28th Feb 2001. Household schedule was canvassed by the enumerator and with a view to ensuring uniformity in approach in understanding the various concepts and in proper eliciting and recording of the information, the enumerators and supervisors were imparted both theoretical as well as practical training intensively in 3 rounds.

As a prelude to the actual census the urban and rural areas were identified and listed out in respect of each administrative unit. The Directorate of Census Operations had prepared the list of urban areas and simultaneously, a list of villages. These lists formed the basic frame for the organization of the census operations. Thereafter, geographical areas that could be conveniently covered by each enumerator were carefully carved out to constitute the enumerator’s block (EB).

The second major step was the house listing operation, which was carried out in this District Territory during April 2000. Thereafter, in order to adhere to the prescribed workload norms the actual census enumerator’s blocks were carefully demarcated on the basis of the house list population and the layout sketches and notional maps prepared for the house listing operation. House listing operation was also utilized to collect wealth of information on items such as predominant material used for construction of houses, amenities available to the census households, number of living rooms etc

Distribution of Population in Rural and Urban Areas

In 2001, the total population of Salem District was recorded as 3,016,346; the rural population as 1,626,162 and the urban population as 1,390,184. In 1991, these were 2,573,667, 1,739,455 and 834,212 respectively.

This above table provides the talukwise distribution of population, number of villages and towns of Salem District. The district’s population for total, rural and urban were 3,016,346, 1,626,162 and 1,390,184 respectively.
In regard to total population among the taluks, the highest and the lowest population were reported in Salem and Yercaud taluks with 1,071,211 and 39,080 respectively. Among the rural population, the highest and the lowest were reported in the taluks of Omalur and Yercaud with 346,422 and 39,080. As far as urban population is concerned the highest and the lowest were reported in the taluks of Salem and Vazhapadi with 812,785 and 35,057 respectively. Yercaud taluk reported no urban population. There were 619 villages in the district out of which 557 were inhabited. The highest and the lowest number of inhabited villages were reported in the taluks of Salem and Idappadi with 108 and 20 respectively. There were 45 towns in the district. Salem taluk has the highest number of towns with 12 and the lowest number of towns were reported in Idappadi and Vazhapadi taluks with 3 towns each.

The Table-B gives the distribution of villages by population size range. Out of 557 inhabited villages in the district, maximum number of villages are in the population range of 2000 - 4999 with 185 (33.2%), followed by 100 villages (18.0%) in the range of 1000 - 1999. There are 92 villages (16.5%) in the range of 5000 - 9999. In the thickly population range of 10,000+, there are 13 villages (2.3%). In the less population ranges of 500 - 999, 200 - 499 and less than 200, there are 76 (13.6%), 66 (11.7%) and 26 (4.7%) villages respectively. Mallasamudram C.D. block which has been shown with one village in this district also forms part Namakkal district with maximum number of villages shown in that district.
ANALYTICAL NOTE

Size, Class and Status of Towns.

The tables shown below explain number of towns with their civic status and also size class of the towns in the district. Out of 45 towns in the district, one is a Municipal Corporation, 3 Municipalities, 34 Town Panchayats and 7 Census Towns. The lone Municipal Corporation is coming under Class I. Out of 3 Municipalities one is in Class II with the population of 5000 to 99999 and 2 in Class III with population of 20000 – 49999. Out of 34 Town Panchayats, 6 are in Class III with population of 20000 – 49999, 16 are in Class IV with population of 10000 – 19999 and 12 are in Class V with population of 5000 – 9999. Out of 7 census towns two are in class IV i.e., with population of 10000 – 19999 and 5 are in class V i.e., with population of 5000 – 9999. This district has not even a single town in Class VI with population of less than 5000. And even this table provides the number of statutory and non-statutory towns with size class of town in the district. Out of 45 towns in the district, 38 are statutory towns and 7 non-statutory towns. The census returns statutory town in Class I, 1 statutory town in Class II, 8 statutory towns in Class III, 16 statutory towns in Class IV, and 12 statutory towns in Class V in the district. Out of 7 non-statutory towns, 2 are in Class IV and 5 are in Class V.

Decadal Growth of Population

The following table gives the population growth variation for total, rural and urban wise for both 1991 and 2001. There is a growth of 17.2% in total population between 1991 – 2001. There is decline in rural population which works out to –6.5%. An increase of 66.6% has been reported in urban population due to many villages treated as urban in 2001. The percentage of urban population which was 32.4% during 1991 is now 46.1% in 2001.

<th>Density of Population</th>
<th>Sex Ratio</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tamil Nadu</td>
<td>480</td>
<td>987</td>
</tr>
<tr>
<td>Salem</td>
<td>578</td>
<td>929</td>
</tr>
</tbody>
</table>

The above provides the density of population and sex ratio for Tamil Nadu and Salem district. It was returned in 2001 that 480 persons for the state and 575 persons for the district per sq.km., Likewise, sex ratio in the state has reported 987 whereas the district reported only 929.

Literacy

A person who can both read and write with understanding in any language has been taken as literate. A person who can merely read but cannot write is not literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard. Like 1991 Census all children of age 6 years or less are treated as illiterates although they may be going to school and can read and write a few odd words. During 1981 Census this limit was upto the age of 4 years. It has also been decided in the 2001 Census to use only effective literacy rates i.e. the ratio of literates and population excluding the age group of 0-6.

Table F: LITERACY

<table>
<thead>
<tr>
<th>Name of the State/District</th>
<th>Persons</th>
<th>Literates</th>
<th>Males</th>
<th>Females</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tamil Nadu</td>
<td>73.5</td>
<td>82.4</td>
<td>64.4</td>
<td></td>
</tr>
<tr>
<td>Salem District</td>
<td>65.1</td>
<td>74.4</td>
<td>55.2</td>
<td></td>
</tr>
</tbody>
</table>

This table provides the literacy rate for the state as well as district for persons, males and females. The literacy rate has been worked out treating children in the age of 0–6 as illiterates. The literacy rate among persons, males and females for the state were 73.5%, 82.4% and 64.4% respectively. The same for the district among persons, males and females are 65.1%, 74.4% and 55.2% respectively.
TABLE I: SCHEDULED CASTES AND SCHEDULED TRIBE POPULATION

<table>
<thead>
<tr>
<th>Name of the District</th>
<th>Total Rural Population</th>
<th>Total Scheduled Castes Population (percentage)</th>
<th>Total Scheduled Tribe Population (percentage)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Salem</td>
<td>3,016,346</td>
<td>475,738 (15.8)</td>
<td>103,921 (3.4)</td>
</tr>
<tr>
<td>Rural</td>

This table shows the C.D. blockwise percentage of main workers, marginal and non-workers by sex in C.D. blocks. The percentage of main worker, marginal workers and non-workers of the district were 46.3%, 8% and 45.7% respectively. It is seen from the table that the main workers were more (57.5%) in Edappadi C.D. block and less (34.4%) in Salem C.D. block. Marginal workers were 24.7% and 6.6% in Mallasamudram and Salem C.D. block respectively. As a whole, the total workers were more (68.3%) in Mallasamudram C.D. block and less (41.9%) in Salem C.D. block. The non-workers were found the highest (58.1%) in Salem C.D. block and the lowest (31.7%) in Mallasamudram C.D. block.
### TABLE 33: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Note: Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

** The whole part of the amenities goes to Sankari C.D. block in Salem district.

This table furnishes C.D. blockwise distribution of inhabited villages according to availability of different amenities in the district. Out of 557 villages, all the villages have drinking water facilities, 543 villages (97.5%) have power supply, 491 villages (88.2%) have pucca roads, 495 villages (88.9%) have telephone facilities, 476 villages (85.5%) have education facilities, 428 villages have transport communication facilities, 387 villages have post office facilities, 327 villages have medical facilities, 189 villages have agricultural credit societies and 65 villages have banking services. Compared with other facilities the availability of bank facility is very poor in the district. In 65 villages (11.7%) have such location among 21 C.D. block in this district. Regarding agricultural credit society facility, out of 557 villages, 189 villages have this facilities. The district, has extended all amenities to all villages.

Note: - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

</table>

This table provides information about distribution of villages not having certain amenities and arranged to the distance range from the place where the amenities are available in Salem district. It is seen from the table that the hospital amenities is not available for 541 villages within their villages. These villages avail these facilities within 5kms, 134 villages, between 5 - 10 for 154 villages and beyond 10 kms for 254 villages. Banking services, agricultural societies, post offices, bus services and education facilities are not available to 365, 177, 115 and 79 villages respectively within their villages. The telephone facilities is not available to the 59 villages within.
# Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

This table gives distribution of inhabited villages according to the distance from the nearest town where availability of different amenities has been reported. Among the total inhabited villages (557), 136 villages are located at the distance of 0 - 5 kms from the nearest town in the district which have full coverage of telephone, pucca road and education amenities. Similarly, 277 villages are located at the distance of 5 - 15 kms and 124 villages have nearest town between 16 - 50 kms.

**District Total:** 557 | 366,500.9 | 67.4 | 32.7

*Note:* Cultivable area = irrigated area + unirrigated area

The above table furnishes the distribution of villages according to the land use in 2001. The total area of 557 villages was 366,509.9 hectares; the cultivable area to the total area recorded as 67.4%. The percentage of irrigated area of the total cultivable area work out to 32.7. Konganapuram and Veerapandi C.D. blocks shows the highest percentage of cultivable area to the total area viz., 92.8 and 84.6 respectively. Panaimarathupatti C.D. block shows the lowest with 40.7%. The Gangavalli C.D. block occupies the first place of having 65.1% as irrigated area.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water'. However, the concept of improved drinking water is state specific and this is to be considered accordingly source.

The above table provides percentage of households having improved drinking water sources, electricity, bathroom, toilet and drinking facilities in the rural and urban areas of Salem District. It is seen that all households have the facility of improved drinking water, followed by 79.44% with electricity facility, 43% with Drainage, 36.38% with Bathroom and 26.98% with Toilet facilities in the District.

Table 52 present in detail the number of households availing banking services and available assets in each households in the District. Majority of the households (222443) by Radio & Transistors (234,305) and Television owned by 262,803 households while looking at the Rural and Urban house holds in the District it is found that majority of them own the specified assets much as Radio, Television and so on. Similarly, number of households availing banking services in the urban (59,931 household) than the Rural. The same trend has been noticed in all Taluks in the District.
(ix) Major social and cultural events, natural and administrative developments and significant activities during the decade.

A few social welfare schemes are being implemented. The oldage pension scheme is common and aid to pregnant women, aid for poor women marriage and handicapped persons are also being implemented in this district. The Samathuvapuranam scheme was initiated for the habitation to all community/caste at one place.

(x) Brief description of places of religious, historical or archaeological importance in villages and places of Tourist interest in the towns of the district.

Salem District has a good number of picturesque hill ranges, some of them with famous temples at the top. Yercaud is located in Shervaroy Hill range which is the famous hill resort of the district and 30 Kms away from North of Salem and can be reached by good motorable road. The altitude of Yercaud is about 5000 feet above Mean Sea Level (MSL) and the temperature ranges between 13°0 C to 29°0 C. The climate therefore is pleasant throughout the year. The places of interest in Yercaud are the lakes, parks, orchards, horticultural research station etc. The Tamil Nadu Tourism Development Corporation runs a well established tourist bungalow named Hotel Tamil Nadu. There is also a youth hostel with dormitory accommodation established by the Tourism Development Corporation. Besides these, there are Highways Travellers Bungalow, Township Rest House and a Standard Hotel by name Hotel Shervaroy.

Publicity has been given through various means for developing tourism. Yercaud and Mettur Dam have also been developed as tourist centres. There are 24 tourist bungalows in the district maintained by the Highways and Rural Works Department. Besides, 12 PWD Bungalows and 2 Tourist Houses are run by Municipalities. Progress was made for the development of Tourism under Municipal schemes in Salem and under the Township Schemes at Mettur.

Salem District is dotted with more than 750 temples, big and small, some of them dating back to the Chera, Chola and Pandya periods. A few of these temples are more than 1000 years old and one of them over 5000 years old. Many of these temples are located in the hill ranges and rocks. Saivite Saints like Appar, Manickavachagar, Thirugnana Sambandhar and Arunagirinathar have sung in praise of some of these temples.

Kallasanthar temple at Taramangalam, about 24 Kms North West of Salem, on the way to Mettur Dam, is famous for its excellent stone carvings on the pillars. This temple is said to have been built during the Nayak regime though the region of the temples dates back to Chera, Chola and Pandyas.

The Mettur Dam across the river Cauvery in Salem District is one of the biggest reservoir with a water spread of 15540 hectares. This reservoir is not only the main source of irrigation to Tiruchirapalli, Tiruvarur, Nagapattinam, and Thanjavur Districts, but also houses a Hydro-Electricity unit besides being a big water resource for fishing.

(xi) Major Characteristics of the district, contribution of the district in the form.

In the Year of 1635 A.D, the area came successively under the rule of Muslim Sultans of Bijapur and Golconda, Mysore Kings and then the Marattas. In the year 1750 A.D, Hyder Ali came to power. During the period, it was a history of power struggles between Hyder Ali and later, Tippu Sultan with the British. With the surrender of Tippu to the British in 1792 A.D, the entire Salem District came into the hands of British Collector.

(xii) Scope of Village and Town Directory

Village Directory

The “Village Directory” is one of the traditional compilations of the Census. It gives the list of Revenue villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. The villages which are considered as Census Towns, the amenities data are shown in the Town Directory.
The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code and area of the village. The land use data for such villages are shown in col. 19 to 23.

Town Directory:

The Town Directory is presented for each town covering different aspects of urban life. Like 1991 census, in the present census also there are seven Statements to be included in the District Census Handbook for presentation of data. The seventh Statement relates to slums which was numbered as IV – A in 1991 Census. Statements I to VI contain data about growth, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, Industry, Banking facilities. The Erode District has sixty seven towns (including two U.A.s), the data for those towns/U.A.s has been presented in these six Statements. Similarly the seventh Statement presents the data for slums.

Statement I shows status and growth history of the towns of Erode District. Column 2 in this Statement indicates class, name and civic administration status of a town (as in 2000). Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the State and at the national level. Column 6 presents area in Sq. kms. while Column 7 presents number of households including houseless households. Columns 8 to 18 give population and growth rate of towns since 1901. Column 19 presents density and Columns 20 to 22 present sex-ratio.

Statement II shows physical aspects and location of each town as in 1999. Column 2 shows the class and name of Town. Columns 3 to 5 show the rainfall and maximum and minimum temperature. Columns 6 to 13 show the name and distance of State HQ, district HQ, Tahsil HQ, nearest city with a population of one lakh and more, nearest city with a population of five lakh and more, Railway Station, Bus facility and Navigable river/canal from town.

Statement III shows the municipal finance of the Towns. The income and expenditure for the towns of Erode has been presented in this Statement.

Statement IV provides information for civic and other amenities available to the Town. This Statement presents general population as well as the Scheduled Castes/Scheduled Tribes population as per 2001 census under Columns 3, 4 and 5. Columns 6 to 20 present data regarding road length, system of sewerage, number of latrines, method of disposal of night soil, protected water supply, fire fighting service, electric connections for domestic, industrial and commercial as well as road lighting (points) and others.

Statement V gives information regarding educational, medical, recreational and cultural facilities available in the town. Population figures for 2001 census have also been presented for the towns of Erode District which will facilitate in analyzing data on facilities available to the people. Data pertaining to medical facilities have been obtained from Director of Health Services and shown under Columns 4 and 5. The information on educational facilities has been shown under Column 6-15.

This Statement also shows, number of working women's hostels, recreational and cultural facilities available in the town under Columns 16 to 20.

Statement VI presents information in respect of trade, commerce, industry and banking services in the towns. Columns 3 to 8 indicate three most important commodities exported and manufactured in the Towns. Information on number of banks available in the towns have been presented under column 9 whereas Columns 10 and 11 show the number of agricultural and non-agricultural credit societies in the towns.

Statement VII shows the various civic amenities available in the slums of sixty seven towns of Erode District.
Part - A

VILLAGE AND TOWN DIRECTORY
(a) Note explaining the abbreviations used in the village directory

The Village Directory format has 23 columns and the details given under each column for the village are as follows:

Columns 1 : Serial Number

Self explanatory. All the villages within the CD block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of the village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Columns 3 : Area of the village

The area of the villages in hectares are given.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities:

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz. <5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below:

Column 6 : Educational

Classes upto class V included in Primary School. Classes from VI to VIII are included in the Middle school. Classes from IX and X included in Secondary / High school. Classes XI and XII are included in Higher / Senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below:

(i) Primary School P
(ii) Middle School M
(iii) High/Secondary School S
(iv) Higher/Senior Secondary School SS
(v) College C
(vi) Industrial School I
(vii) Training School Tr
(viii) Adult literacy class/centre AC
(ix) Others (specify) O

Computer Training institutes,
Tailoring Classes, Music and Dance Classes etc.

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes:

...
<table>

</tr>
<tr>
<td>(iii) Stadium/Auditorium                     ST</td>
</tr>
</tbody>
</table>
Column 13 : Communications

If the village is served by any mode of public/private transport like Bus, Railway station or Navigable water ways they are to be mentioned as follows:

(i) Bus  BS
(ii) Railway Station  RS
(iii) Navigable Waterway  NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes:

(i) Paved Road  PR
(ii) Mud road  MR
(iii) Foot path  FP
(iv) Navigable River  NR
(v) Navigable Canal  NC
(vi) Navigable waterways other than River, Canal  NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes:

(i) Electricity for domestic use  ED
(ii) Electricity for agricultural use  EAG
(iii) Electricity for other purposes  EO
(iv) Electricity for all purposes  EA

Column 17 : News Paper/Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i) News Paper  N
(ii) Magazine  M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/U.T. Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The codes used for different types of irrigation facilities available in the village are indicated below:

(i) Government Canal  GC
(ii) Private Canal  PC
(iii) Well (without electricity)  W
(iv) Well (with electricity)  WE
(v) Tubewell (without electricity)  TW
(vi) Tubewell (with electricity)  TWE
(vii) Tank  TK
(viii) River  R
(ix) Lake  L
(x) Waterfall  WF
(xi) Others  O
(xii) Total  T

The village directory also carries the following appendices.

Appendix-I  It gives the abstract of educational, medical and other amenities available in villages C D block wise of the district.

Appendix-I-A Indicates number of villages C D block wise having one or more primary schools.

Appendix-I-B Indicates number of villages C D block wise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages C D block wise with different sources of drinking water facilities.
<table>

### Land Use

- **GC**: Cereals (Hectare)
- **W**: Weeds (Hectare)
- **WE**: Others (Hectare)
- **GCW**: Total is the addition of GC, W, and WE, considering 1% of WE as gacchar and groves.

### Table Details
- **Serial number**: The serial number for each entry.
- **Name of village**: The name of the village.
- **Area not available for cultivation**: The area not available for cultivation.
- **Culturable waste (including gauchar and groves)**: The area under culturable waste.
- **Unirrigated**: The area under unirrigated land.
- **Irrigated (by source)**: The area under irrigated land by different sources.
- **PRMR Valappady (19) EA**: The area under different land use categories in hectares for PRMR Valappady (19) EA.
- **PRMR Valappady (5) EA**: The area under different land use categories in hectares for PRMR Valappady (5) EA.
- **PRMR Valappady (7) EA**: The area under different land use categories in hectares for PRMR Valappady (7) EA.
- **PRMR Valappady (20) EA**: The area under different land use categories in hectares for PRMR Valappady (20) EA.

Note: The data pretends to this appendix table is not available.
Section II - Town Directory

(i) Note explaining the abbreviations used in the Town directory

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows:

<table>
<thead>
<tr>
<th>Population</th>
<th>Class</th>
</tr>
</thead>
<tbody>
<tr>
<td>100,000 and above</td>
<td>I</td>
</tr>
<tr>
<td>50,000 - 99,999</td>
<td>II</td>
</tr>
<tr>
<td>20,000 - 49,999</td>
<td>III</td>
</tr>
<tr>
<td>10,000 - 19,999</td>
<td>IV</td>
</tr>
<tr>
<td>5,000 - 9,999</td>
<td>V</td>
</tr>
<tr>
<td>Below 5,000</td>
<td>VI</td>
</tr>
</tbody>
</table>

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i) Municipal Corporation M. Corp.
(ii) Municipal Committee MC
(iii) Municipal Council MCI
(iv) City Municipal Council CMC
(v) Town Municipal Council TMC
(vi) Municipal Board MB
(vii) Municipality M
(viii) Cantonment Board/Cantonment CB
(ix) Notified Area NA
(x) Notified Town NT
(xi) Notified Area Committee/Notified Area Council NAC
(xii) Notified Town Area NTA
(xiii) Industrial Notified Area INA
(xiv) Industrial Township ITS
(xv) Township TS
(xvi) Town Panchayat TP
(xvii) Nagar Panchayat NP
(xviii) Town Committee/Town Area Committee TC
(xix) Small Town Committee ST
(xx) Estate office EO
(xxi) Gram Panchayat GP
(xxii) Census Town CT

Others columns need no comments.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum and Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.
TOWN DIRECTORY

Column 9 & 10:

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13:

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998–99 is recorded.

Statement IV: Civic and Other amenities, 1999

Column (1 to 5): Self explanatory.

Column (6): Road length (in kms.)

Information about kutcha/pucca road is recorded separately for the roads within the limits of the referent town.

(i) Pucca Road PR
(ii) Kutcha Road KR

Column (7): System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows:

(i) Sewer S
(ii) Open Surface Drains OSD
(iii) Box Surface Drains BSD
(iv) Syilk Drains SD
(v) Cesspool method CP
(vi) Pit System Pt
(vii) Others O

Column 8 to 11: Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12: Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes:

Head Loads HL
Basket B
Wheel Barrows WB
Septic Tank ST
Pit System Pt
Sewerage S
Others O

Column 13 and 14: Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13:

(i) Tap water T
(ii) Tube-well water TW
(iii) Tank Water TK
(iv) Well water W

Column 14:

(v) Over Head Tank OHT
(vi) Service Reservoir SR
(vii) River Infiltration Gallery RIG
(viii) Bore Well Pumping System BWP
(ix) Pressure Tank PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.
Column 15: Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20: Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V: Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3: Self explanatory.

Column 4 & 5:

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, which are treated as independent units and counted separately using following codes:

(i) Hospital H
(ii) Dispensary D
(iii) Health Centre HC
(iv) Family Welfare Centre FWC
(v) T.B. Clinic TB
(vi) Nursing Home NH
(vii) Others O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below:

Ayurvedic A
Unani U
Homoeopathic Hom

Column 6 to 9:

The codes used for these columns are as follows:

(i) Arts only A
(ii) Science only S
(iii) Commerce only C
(iv) Arts & Science only AS
(v) Arts & Commerce only AC
(vi) Combined for all categories - Arts, Science and Commerce ASC
(vii) Law L

Column 10: Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used:

(i) Shorthand SH
(ii) Typewriting Type
(iii) Shorthand & Typewriting SH Type
(iv) Others O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14:

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.
Schools up to VIII are considered as Middle school or Junior Secondary.

Schools up to class X are considered as Matriculation or Secondary schools.

Schools up to XI or XII classes are considered as Higher Secondary/Intermediate/Pre University /Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

**Column 15 : Adult literacy class/centres**

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

**Column 16 : Working Women's hostels with number of seats**

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

**Column 17 to 19 : Recreational and Cultural Facilities**

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

**Column 20 : Public Libraries, Reading Rooms**

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows:

(i) Public Library \( PL \)
(ii) Reading room \( RR \)

**Statement VI : Trade, Commerce, Industry and Banking, 1999**

**Column 3 to 8 :**

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

**Column 9 : Number of Banks**

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

**Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

**Statement VII : Civic and other Amenities in Slums, 1999**

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.
